Comprehensive Master STR Roadmap: Pre-Listing vs. Post-Listing

This document contains **every single line item** from the 11 Master STR Checklists, categorized by literal timing requirements.

---

01 Planning Master Checklist

Task Item	Timing	Description
A. Strategy and Positioning		
☐ Confirm core objective is still `5-star guest experience` with `12%+ annual yield`.	**[Pre-Listing]**	Aligns all setup decisions with the high-yield, high-satisfaction business model.
☐ Confirm target audiences are finalized: Families, High-End Group Stays, Remote-Work Travelers.	**[Pre-Listing]**	Defines the specific guest segments to tailor marketing and amenity choices.
☐ Confirm unique positioning statement is locked: `Tactile Luxury & Functional Scale`.	**[Pre-Listing]**	Establishes the property's competitive edge in the local market.
☐ Confirm brand promise is locked: measurement-backed accuracy + frictionless hospitality.	**[Pre-Listing]**	Commits to operational excellence and transparency for future guests.
☐ Confirm first 90-day targets are accepted:	**[Pre-Listing]**	Sets measurable success metrics for the initial launch phase.
☐ First 5 bookings within 21 days of launch.	**[Pre-Listing]**	Focuses early efforts on generating initial momentum and reviews.
☐ Occupancy target 60-65% in stabilization phase.	**[Pre-Listing]**	Sets the baseline for expected rental performance during stabilization.
☐ ADR target $210-$225.	**[Pre-Listing]**	Establishes the daily rate goal to meet revenue projections.
☐ Guest sentiment target 4.9+ stars.	**[Pre-Listing]**	Prioritizes high-quality service to secure long-term platform ranking.
B. Market Calibration (02_Market_Research)		

Task Item	Timing	Description
☐ Complete `MKT-001` Comp Set ADR research.	**[Pre-Listing]**	Gathers competitive pricing data to inform the property's rate strategy.
☐ Complete `MKT-002` Comp Set Occupancy research.	**[Pre-Listing]**	Analyzes competitor bookings to set realistic occupancy expectations.
☐ Complete `MKT-003` Seasonality research.	**[Pre-Listing]**	Identifies high and low demand periods to optimize seasonal pricing.
☐ Complete `MKT-004` Booking Window research.	**[Pre-Listing]**	Determines how far in advance guests book to refine lead-time strategies.
☐ Complete `MKT-005` Amenity Demand research.	**[Pre-Listing]**	Pinpoints the features most valued by local travelers to guide amenity selection.
☐ Complete `MKT-006` Channel Mix research.	**[Pre-Listing]**	Evaluates which booking platforms yield the best results for the area.
☐ Validate comp criteria remains accurate: Austin 78744, 3+ BR, 2+ BA, ~1600-1800 sq ft.	**[Pre-Listing]**	Ensures the benchmarking set remains relevant to the property's size and location.
☐ Identify and track 5 top-performing local comps.	**[Pre-Listing]**	Monitors successful peers to stay competitive and learn from their tactics.
☐ Review latest 10 guest reviews per comp for amenity-demand signals.	**[Pre-Listing]**	Extracts qualitative feedback from competitors to avoid their mistakes.
☐ Reconcile market tracker at least monthly.	**[Ongoing]**	Maintains up-to-date market intelligence throughout the property's lifecycle.
C. Budget Discipline (03_Budgeting)		
☐ Confirm total launch budget baseline is still valid.	**[Pre-Listing]**	Validates that the initial financial plan is still feasible.
☐ Confirm each budget line has current actuals and variance:	**[Ongoing]**	Monitors ongoing costs against projections to prevent overspending.

Task Item	Timing	Description
☐ BUD-001 Design and Furnishing.	**[Ongoing]**	Tracks expenditures related to the aesthetic and functional setup of the home.
☐ BUD-002 Setup and Installation.	**[Ongoing]**	Monitors the costs of physical installation and staging activities.
☐ BUD-003 Marketing Launch.	**[Ongoing]**	Accounts for the investment required to launch the property on major platforms.
☐ BUD-004 Operations Start.	**[Ongoing]**	Tracks the initial costs of setting up cleaning and management services.
☐ BUD-005 Maintenance Reserve.	**[Ongoing]**	Sets aside funds for unexpected repairs and routine property upkeep.
☐ BUD-006 Compliance and Insurance.	**[Ongoing]**	Covers the legal and insurance costs necessary for safe operation.
☐ BUD-007 Contingency Buffer.	**[Ongoing]**	Maintains a financial safety net for unforeseen project expenses.
☐ Confirm contingency spend rule is enforced (document trigger before use).	**[Pre-Listing]**	Ensures that emergency funds are only used for justified triggers.
☐ Confirm budget variance remains under 10% overage target.	**[Ongoing]**	Keeps the project within a strict 10% financial margin.
D. Timeline Control (04_Project_Timeline)		
☐ Confirm all milestones have owner, status, and dependency integrity.	**[Pre-Listing]**	Ensures every project phase has clear accountability and logical flow.
☐ TIM-001 Design and Theme Lock completed.	**[Pre-Listing]**	Marks the completion of the creative planning phase for the home.
☐ TIM-002 Procurement Ordering Window completed.	**[Pre-Listing]**	Signals that all necessary items have been ordered for the setup.
☐ TIM-003 Install and Staging Execution completed.	**[Pre-Listing]**	Completes the physical transformation of the property for guest use.

Task Item	Timing	Description
☐ `TIM-004` Photo and Listing Asset Capture completed.	**[Pre-Listing]**	Captures the visual assets needed to create a high-converting listing.
☐ `TIM-005` Pricing and Promotions Setup completed.	**[Pre-Listing]**	Establishes the revenue rules and promotional layers for the launch.
☐ `TIM-006` Compliance Verification Gate completed.	**[Pre-Listing]**	Verifies that all legal and safety requirements are met before go-live.
☐ `TIM-007` Go-Live Readiness Review completed.	**[Pre-Listing]**	Final check to ensure the property is fully prepared for its first guest.
☐ Confirm schedule variance remains within `< 5 days` from 30-day launch target.	**[Pre-Listing]**	Maintains project momentum to meet the 30-day launch goal.
☐ Confirm go-live is blocked unless `TIM-004`, `TIM-005`, and `TIM-006` are clear.	**[Pre-Listing]**	Prevents a premature launch without critical assets or safety clearance.
E. Risk Mitigation (05_Risk_Register)		
☐ Confirm all High-impact risks have active mitigation plans.	**[Pre-Listing]**	Ensures that the most significant threats to the business have active solutions.
☐ Review and update `RSK-001` Compliance delay risk.	**[Ongoing]**	Monitors the risk of permit or legal delays affecting the launch date.
☐ Review and update `RSK-002` Turnover inconsistency risk.	**[Ongoing]**	Addresses the potential for inconsistent cleaning quality after check-outs.
☐ Review and update `RSK-003` Over-discounting risk.	**[Ongoing]**	Prevents excessive price cuts that could erode profit margins.
☐ Review and update `RSK-004` Maintenance disruption risk.	**[Ongoing]**	Mitigates the impact of sudden system failures on guest stays.
☐ Review and update `RSK-005` Slow booking pace risk.	**[Ongoing]**	Develops strategies to respond if the property fails to attract guests early.
☐ Re-rank top 3 risks weekly.	**[Ongoing]**	Prioritizes management focus on the most pressing weekly threats.

Task Item	Timing	Description
☐ Confirm risk neutralization target is satisfied for all High-impact items.	**[Pre-Listing]**	Validates that all major concerns have been sufficiently addressed.
F. Weekly Operating Cadence		
☐ Run the weekly planning checkpoint (15-minute audit).	**[Ongoing]**	Conducts a rapid audit of all project pillars to maintain control.
☐ Update at least one timeline milestone this week.	**[Ongoing]**	Ensures the project schedule reflects current progress.
☐ Reconcile actual spend this week.	**[Ongoing]**	Keeps the financial tracking accurate and up-to-date.
☐ Update at least one market research row this week.	**[Ongoing]**	Refines market intelligence based on the latest available data.
☐ Re-rank top 3 risks this week.	**[Ongoing]**	Adjusts risk priorities based on the week's developments.
☐ Record Schedule Adherence, Budget Variance, and Risk Mitigation scores (0-100).	**[Ongoing]**	Quantifies project performance to identify areas for improvement.
G. Failure-Mode Response Gates		
☐ If schedule slips >3 days, execute parallelization plan for phases 2 and 3.	**[Pre-Listing]**	Triggers a plan to recover lost time through parallel work streams.
☐ If budget overage >10%, trigger sourcing reprioritization.	**[Pre-Listing]**	Forces a rethink of sourcing priorities to regain financial control.
☐ If a new High-impact risk appears, create mitigation entry immediately.	**[Ongoing]**	Ensures immediate attention is given to any newly identified threats.
☐ If occupancy falls >10 points below target for 2 weeks, escalate with controlled weekday rate adjustments.	**[Post-Listing]**	Provides a structured response to low booking rates after listing.
H. Pre-Listing Go/No-Go for Planning Section		
☐ Strategy, market, budget, timeline, and risk trackers are all current.	**[Pre-Listing]**	Confirms all foundational planning documents are complete and accurate.

Task Item	Timing	Description
☐ No unresolved compliance blocker remains in planning scope.	**[Pre-Listing]**	Ensures the property is legally cleared for public listing.
☐ All planning dependencies handed off to downstream sections (Design, Setup, Pricing, Legal).	**[Pre-Listing]**	Transitions the project from theoretical planning to physical execution.
☐ Planning section is formally marked `Go` for listing readiness progression.	**[Pre-Listing]**	Formally authorizes the project to move into the design phase.
Completion Rule		
☐ Mark `01_Planning` complete only when every required checkbox above is done or explicitly marked N/A with reason.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

02 Property Design Master Checklist

Task Item	Timing	Description
A. Section Strategy and Identity		
☐ Confirm design strategy is locked to `Organic Austin Modern`.	**[Pre-Listing]**	Ensures the aesthetic remains consistent with the target "Austin" brand.
☐ Confirm property tone remains `Tactile Luxury & Functional Scale`.	**[Pre-Listing]**	Maintains the balance between high-end feel and practical usage.
☐ Confirm cross-room consistency rules are enforced (wood, metals, lighting temperature).	**[Pre-Listing]**	Prevents a disjointed look by standardizing materials and lighting.
☐ Confirm guest-first functionality is embedded (charging, lighting, acoustics).	**[Pre-Listing]**	Prioritizes user convenience in all design choices.
B. Floorplans and Measurement Verification (01_Layouts_Floorplans)		
☐ Measurement baseline is validated against `2026-04-01__Property_Measurement_Verification_Sheet__v1`.	**[Pre-Listing]**	Validates that all furniture choices fit within the actual physical dimensions.
☐ All `VERIFY` fields in measurement sheet are resolved or documented with decision.	**[Pre-Listing]**	Ensures no critical dimensions are left to guesswork.
☐ Master Bedroom layout validated.	**[Pre-Listing]**	Confirms the king-size setup fits comfortably with circulation.

Task Item	Timing	Description
☐ Secondary Bedroom #1 layout validated.	**[Pre-Listing]**	Validates the room's furniture arrangement for guest comfort.
☐ Secondary Bedroom #2 layout validated.	**[Pre-Listing]**	Ensures the third sleeping space is optimally configured.
☐ Great Room layout validated.	**[Pre-Listing]**	Plans the central social hub for maximum seating and flow.
☐ Den layout validated.	**[Pre-Listing]**	Configures the flexible space for both work and relaxation.
☐ Front Entryway layout validated.	**[Pre-Listing]**	Designs a welcoming and functional first impression for guests.
☐ Primary circulation paths meet minimum `36"` rule.	**[Pre-Listing]**	Ensures mobility throughout the home meets standard clearance rules.
☐ Social zones in kitchen/great room meet `42"-48"` targets.	**[Pre-Listing]**	Provides enough space for group interactions in high-traffic areas.
C. Interior Design Room Guides (02_Interior_Design)		
☐ Interior Design Playbook is treated as current operating source.	**[Pre-Listing]**	Uses the primary design document as the source of truth for implementation.
☐ Primary Bedroom guide implementation complete.	**[Pre-Listing]**	Completes the aesthetic and functional setup for the main suite.
☐ Master Bathroom guide implementation complete.	**[Pre-Listing]**	Ensures the primary bath meets luxury and hygiene standards.
☐ Master Walk-in Closet guide implementation complete.	**[Pre-Listing]**	Optimizes the storage space for long-term or group stays.
☐ Great Room guide implementation complete.	**[Pre-Listing]**	Delivers a cohesive social space according to the design plan.
☐ Kitchen guide implementation complete.	**[Pre-Listing]**	Sets up the culinary heart of the home for guest utility.
☐ Common Hallway/Entryway guide implementation complete.	**[Pre-Listing]**	Creates a high-impact transition zone throughout the property.
☐ Secondary Bedroom #1 guide implementation complete.	**[Pre-Listing]**	Finishes the South Congress themed room setup.

Task Item	Timing	Description
☐ Secondary Bedroom #2 guide implementation complete.	**[Pre-Listing]**	Completes the Barton Springs themed room setup.
☐ Second Bathroom guide implementation complete.	**[Pre-Listing]**	Prepares the shared bathroom for guest use and durability.
☐ Den guide implementation complete.	**[Pre-Listing]**	Finalizes the multipurpose lounge and office area.
☐ All open `TBD` fields in room guides resolved.	**[Pre-Listing]**	Removes all remaining design uncertainties from the room guides.
☐ All room-level install checklists are fully checked or marked N/A with reason.	**[Pre-Listing]**	Verifies that every specific design task has been executed.
D. Materials, Finishes, and Room Specs		
☐ All finishes align with `MATERIALS_FINISHES.md`.	**[Pre-Listing]**	Standardizes the tactile quality of the home across all rooms.
☐ Approved wood tones only (`White Oak` or `Walnut`).	**[Pre-Listing]**	Restricts materials to high-quality white oak or walnut for consistency.
☐ Consistent metal system enforced (`Matte Black` and allowed `Brushed Brass` accents).	**[Pre-Listing]**	Maintains a modern look with matte black and brass accents.
☐ Prohibited material set avoided (grey-wash, plastic-heavy, poor faux-leather).	**[Pre-Listing]**	Protects the brand by excluding low-quality or dated materials.
☐ Warm-dim lighting standard applied (`2700K-3000K`).	**[Pre-Listing]**	Ensures a cozy and high-end ambiance in the evenings.
☐ Room Spec Templates validated for Kitchen, Great Room, Bedroom, Den, Bathroom.	**[Pre-Listing]**	Standardizes the documentation for all interior spaces.
☐ No `UNKNOWN` specification fields remain in design scope.	**[Pre-Listing]**	Guarantees that every material and finish is clearly defined.
E. Brand Style Themes (03_Brand_Style_Themes)		
☐ Standards precedence honored (`01_Standards_Strategy` overrides conflicts).	**[Pre-Listing]**	Resolves design conflicts by defaulting to the core strategy.
☐ Room Theme Matrix alignment confirmed for all target areas.	**[Pre-Listing]**	Aligns individual room aesthetics with the overall property brand.
☐ Theme Standards Spec rules enforced (palette, materials, lighting, durability).	**[Pre-Listing]**	Enforces durability and style rules for themed areas.
Room themes locked:	**[Pre-Listing]**	

Task Item	Timing	Description
☐ Master Bedroom: `Hill Country Retreat`.	**[Pre-Listing]**	Creates a calm, nature-inspired retreat for the primary guests.
☐ Secondary Bedroom #1: `South Congress Studio`.	**[Pre-Listing]**	Offers a vibrant, local-inspired studio feel for visitors.
☐ Secondary Bedroom #2: `Barton Springs Calm`.	**[Pre-Listing]**	Provides a serene, water-inspired atmosphere for relaxation.
☐ Den: `Live Oak Creative Lounge`.	**[Pre-Listing]**	Designs a creative and functional workspace for remote travelers.
☐ Covered Patio: `Texas Sunset Social Deck`.	**[Pre-Listing]**	Prepares the outdoor area for social gatherings and relaxation.
☐ Brand Style Action Checklist completed.	**[Pre-Listing]**	Completes the specific tasks required to implement the themed looks.
☐ Room Styling Map passes completed for install and staging.	**[Pre-Listing]**	Guides the precise placement of decor for the photography stage.
☐ Theme procurement source of truth is `04_Procurement/2026-04-01__Theme_Procurement_Master__v2.csv`.	**[Pre-Listing]**	Links design choices to the actual purchasing list.
☐ Superseded versions retained only in `99_Archive`.	**[Pre-Listing]**	Keeps the workspace clean by archiving outdated design drafts.
F. Safety, Accessibility, and Compliance (04_Safety_Accessibility)		
☐ Safety baseline meets `SAFETY_ACCESSIBILITY_STANDARD.md`.	**[Pre-Listing]**	Ensures the property complies with the rigorous project safety standard.
☐ Egress paths are fully clear and compliant.	**[Pre-Listing]**	Guarantees that all exit routes are clear for emergency situations.
☐ Fire safety requirements complete (extinguishers, detectors, policies, placements).	**[Pre-Listing]**	Installs and verifies all fire prevention and response equipment.
☐ CO detection and air quality controls complete (including MERV-13 requirement).	**[Pre-Listing]**	Protects guests from carbon monoxide and ensures high air quality.
☐ Hazard mitigation checks complete (trip, tip-over, chemical storage, furniture safety).	**[Pre-Listing]**	Eliminates physical risks like trips, tips, or chemical exposure.

Task Item	Timing	Description
☐ Smart safety systems configured and tested (alerts, lock behavior, leak checks).	**[Pre-Listing]**	Leverages technology to monitor property safety in real-time.
☐ Accessibility standards pass for mobility routes and bathrooms.	**[Pre-Listing]**	Makes the home usable for guests with mobility needs.
☐ Compliance documents complete (STR checklist + local research actions).	**[Pre-Listing]**	Prepares the legal paperwork required for STR operation.
☐ Safety communication materials prepared (manual + emergency instructions).	**[Pre-Listing]**	Provides clear instructions to guests for handling emergencies.
☐ Insurance and risk requirements complete and documented.	**[Pre-Listing]**	Validates that the property is fully covered for rental activities.
☐ `2026-04-01__04_Safety_Accessibility_Tracker__v1.csv` updated with current status and notes.	**[Pre-Listing]**	Maintains a live record of all safety and compliance statuses.
G. Formal Approvals Gate (05_Approvals)		
☐ `AP-001` Layout Signoff = Approved.	**[Pre-Listing]**	Secures final sign-off on the physical arrangement of the home.
☐ `AP-002` Interior Design Signoff = Approved.	**[Pre-Listing]**	Validates the aesthetic choices before final implementation.
☐ `AP-003` Brand Standards Signoff = Approved.	**[Pre-Listing]**	Confirms the property reflects the intended "Austin" identity.
☐ `AP-004` Room Styling Signoff = Approved.	**[Pre-Listing]**	Approves the decorative layer of the home for photography.
☐ `AP-005` Safety and Accessibility Signoff = Approved.	**[Pre-Listing]**	Formally certifies the property meets all safety and access rules.
☐ `AP-006` Final Property Design Release = Approved.	**[Pre-Listing]**	Releases the design section for the procurement and setup phases.
☐ `release_to_procurement` fields are set to `Yes` where required.	**[Pre-Listing]**	Signals that items are ready to be purchased based on design.
☐ `release_to_setup` fields are set to `Yes` where required.	**[Pre-Listing]**	Signals that the property is ready for physical installation tasks.
H. Photo Readiness Gate		
☐ Apply rule: `approved_for_photos = Yes` only if all four checks are `Yes`.	**[Pre-Listing]**	Ensures only fully prepared rooms are scheduled for photography.

Task Item	Timing	Description
☐ `PR-001` Front Entryway approved for photos.	**[Pre-Listing]**	Prepares the first impression zone for the camera.
☐ `PR-002` Great Room approved for photos.	**[Pre-Listing]**	readies the primary social space for its hero shots.
☐ `PR-003` Kitchen and Dining approved for photos.	**[Pre-Listing]**	Cleans and stages the culinary zone for listing photos.
☐ `PR-004` Primary Bedroom approved for photos.	**[Pre-Listing]**	Sets the main suite for high-end hospitality photography.
☐ `PR-005` Primary Bathroom approved for photos.	**[Pre-Listing]**	Polishes the master bath for its close-up shots.
☐ `PR-006` Secondary Bedroom #1 approved for photos.	**[Pre-Listing]**	Showcases the South Congress theme for the listing.
☐ `PR-007` Secondary Bedroom #2 approved for photos.	**[Pre-Listing]**	Showcases the Barton Springs theme for the listing.
☐ `PR-008` Second Bathroom approved for photos.	**[Pre-Listing]**	Prepares the shared bath for clean, hygienic photography.
☐ `PR-009` Den approved for photos.	**[Pre-Listing]**	Highlights the multipurpose work/lounge utility in the photos.
☐ `PR-010` Covered Patio approved for photos.	**[Pre-Listing]**	readies the outdoor social space for its lifestyle shots.
I. Final Release to Next Sections		
☐ Design consistency, safety, and photo gates all passed.	**[Pre-Listing]**	Confirms all design elements work together before closing the phase.
☐ No blocking conditions remain in approvals tracker notes.	**[Pre-Listing]**	Ensures all previous issues have been resolved.
☐ Section marked ready for `03_Furnishing_Procurement` and `04_Setup_Execution`.	**[Pre-Listing]**	Transitions the project to the physical procurement phase.
☐ `02_Property_Design` is formally marked complete.	**[Pre-Listing]**	Formally closes the design section of the roadmap.
Completion Rule		
☐ Mark section complete only when all required items are checked, or explicitly marked N/A with documented rationale.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

03 Furnishing & Procurement Master Checklist

Task Item	Timing	Description
A. Strategy and Budget Controls		
☐ Confirm strategy is aligned to `High Impact, Low Basis`.	**[Pre-Listing]**	Focuses spending on high-visual items while keeping costs low.
☐ Enforce the `70/20/10` sourcing rule (Scavenged/New/DIY).	**[Pre-Listing]**	Balances the budget by mixing used, new, and handmade items.
☐ Confirm durability rule is applied: no unstable major pieces.	**[Pre-Listing]**	Prevents maintenance issues by avoiding flimsy furniture.
☐ Confirm total furniture/decor budget baseline remains valid (`$4,000` target).	**[Pre-Listing]**	Ensures the overall procurement stays within the $4,000 limit.
☐ Reconcile spend after each `$1,000` increment.	**[Ongoing]**	Maintains financial visibility during the heavy purchasing phase.
☐ Track and validate savings vs retail (`>60%` target).	**[Ongoing]**	Measures the effectiveness of the cost-saving sourcing strategy.
B. Inventory Master Plan Requirements		
☐ Great Room sectional meets size rule (min `110"`, usable depth, circulation maintained).	**[Pre-Listing]**	Ensures the primary seating fits the room scale and guest capacity.
☐ Great Room coffee table spec meets scale/character requirements.	**[Pre-Listing]**	Selects a central piece that matches the "Austin Modern" theme.
☐ Great Room TV console width requirement validated.	**[Pre-Listing]**	Validates that the console can support the technology and room scale.
☐ Great Room rug target (`10x14`) validated.	**[Pre-Listing]**	Confirms the rug size is sufficient to anchor the social zone.
☐ Kitchen stools meet island rule (max `18"` width for `142"` island spacing).	**[Pre-Listing]**	Matches seating to the island dimensions for guest comfort.
☐ Dining table capacity and clearance rule validated (`6-8` seats, `36"` pull clearance).	**[Pre-Listing]**	Ensures enough seating for groups while maintaining walk-around space.
☐ Primary suite essentials validated (king frame, 2 nightstands, dresser).	**[Pre-Listing]**	Procures the core furniture needed for a high-end master bedroom.

Task Item	Timing	Description
☐ Hallway gallery/runners plan validated.	**[Pre-Listing]**	Sources the art and rugs needed for the property's transition zones.
☐ Den utility items validated (queen sleeper + `48"` desk).	**[Pre-Listing]**	Equips the flexible room with sleep and work essentials.
☐ Phase priorities are enforced: Phase 1 Critical before Phase 2/3.	**[Pre-Listing]**	Ensures critical "must-have" items are purchased before decor.
C. Inventory Tracker Status (02_Inventory_Master_Plan)		
☐ `INV-001` through `INV-007` have current status, source channel, and notes.	**[Pre-Listing]**	Maintains live status on all items in the primary inventory list.
☐ `measurements_verified` is completed for all critical path items.	**[Pre-Listing]**	Prevents fitment errors by checking item sizes before arrival.
☐ `condition_score` is completed (no `TBD`) for sourced/selected items.	**[Pre-Listing]**	Records the quality of sourced items to ensure brand standards.
☐ `actual_price_usd` populated when purchased.	**[Pre-Listing]**	Tracks real-world spending for final budget reconciliation.
☐ `assembly_required` and handling needs are accurate before delivery scheduling.	**[Pre-Listing]**	Plans labor and tool needs based on item complexity.
D. Sourcing and Vendor Execution		
☐ Weekly sourcing priorities updated in active contact log.	**[Pre-Listing]**	Prioritizes current needs in the search for high-value items.
☐ Seller outreach and pickup windows are current.	**[Pre-Listing]**	Manages the scheduling for used item inspections and pickups.
☐ Pickup transport mode selected (`Rented`, `Borrowed`, or `Personal`).	**[Pre-Listing]**	Secures the necessary vehicle for moving furniture to the property.
☐ Pickup tool kit prepared (drill, Allen keys, straps, blankets).	**[Pre-Listing]**	Prepares the equipment needed for on-site disassembly and transport.
☐ Purchase vetting protocol completed for each used item:	**[Pre-Listing]**	Checks structural, pest, and odor status of each potential purchase.
☐ Structural integrity pass.	**[Pre-Listing]**	Ensures used furniture is safe and long-lasting before purchase.

Task Item	Timing	Description
☐ Pest inspection pass.	**[Pre-Listing]**	Protects the home from infestations by vetting used soft goods.
☐ Odor test pass.	**[Pre-Listing]**	Prevents guest complaints by rejecting items with persistent smells.
☐ Character-vs-damage decision documented.	**[Pre-Listing]**	Decides if wear adds "vibe" or requires costly repair.
☐ Vendor strategy tradeoffs reviewed (FB / Estate / Retail fallback timing).	**[Pre-Listing]**	Balances used sourcing time against the speed of retail buying.
E. Restoration and DIY Quality Gate		
☐ Restoration log updated for each restored item.	**[Pre-Listing]**	Tracks the effort and cost of bringing items up to brand standards.
☐ Standard restoration pass applied where needed (clean, structural fix, hardware, finish).	**[Pre-Listing]**	Applies a consistent level of "refresh" to all used inventory.
☐ Active DIY projects status updated:	**[Pre-Listing]**	Monitors the progress of all scheduled custom furniture builds.
☐ Entry gallery wall project.	**[Pre-Listing]**	Executes the custom art project for the front hallway.
☐ Den reading nook project.	**[Pre-Listing]**	Creates a unique, high-value amenity for the flexible lounge.
☐ Kitchen spice rack upcycle project.	**[Pre-Listing]**	Adds a curated, home-like touch to the culinary space.
☐ Restoration materials inventory is complete and available.	**[Pre-Listing]**	Ensures all supplies are on hand for scheduled DIY tasks.
F. Logistics and Delivery Gate		
☐ Every major item is checked against `60"` entry + hallway turn before transport.	**[Pre-Listing]**	Double-checks that furniture will fit through the home's tightest points.
☐ Protective measures applied during move (corner tape + floor protection).	**[Pre-Listing]**	Prevents damage to the property floors and walls during install.
☐ Upholstered used items complete steam + `24h` quarantine before entry.	**[Pre-Listing]**	Eliminates hygiene risks through deep cleaning and quarantine.

Task Item	Timing	Description
☐ Transport hardware is bagged and attached to corresponding items.	**[Pre-Listing]**	Prevents the loss of critical assembly parts during moving.
☐ Delivery close-out steps complete:	**[Pre-Listing]**	Confirms item placement, floor protection, and debris removal.
☐ Item placed to staging coordinates.	**[Pre-Listing]**	Moves furniture to its final designated position immediately.
☐ Felt pads installed.	**[Pre-Listing]**	Protects the hard floors from furniture scratches and noise.
☐ Debris/protection removed.	**[Pre-Listing]**	Cleans the space as items are unpacked and staged.
G. Procurement, Shipping, and Inventory Reconciliation		
☐ `PROCUREMENT_TRACKER.csv` rows `PR-001` to `PR-007` are current.	**[Pre-Listing]**	Keeps the master log of all active orders and status.
☐ `Order_Status`, dates, and costs are populated where applicable.	**[Pre-Listing]**	Populates the data needed for financial and timeline tracking.
☐ Resolve `UNKNOWN` design spec references in procurement tracker.	**[Pre-Listing]**	Ensures all purchased items align with the original design vision.
☐ `SHIPPING_LOG.csv` is reconciled to related procurement IDs.	**[Pre-Listing]**	Tracks the arrival of all items to coordinate on-site receipt.
☐ Delivery condition on arrival recorded for all received items.	**[Pre-Listing]**	Documents any damage for immediate warranty or return claims.
☐ `MASTER_INVENTORY.csv` status is reconciled with procurement + shipping logs.	**[Pre-Listing]**	Synchronizes the physical inventory with the tracking spreadsheets.
☐ Resolve `UNKNOWN` design spec reference rows in master inventory.	**[Pre-Listing]**	Cleans up data gaps in the final inventory records.
H. Warranties and Manuals Gate		
☐ Warranty records are complete for all new essentials and electronics.	**[Pre-Listing]**	Organizes protection plans for all major property investments.
☐ `Coverage_Start` and `Coverage_End` dates are populated after purchase.	**[Pre-Listing]**	Tracks the duration of active product protections.
☐ Claim process and proof-of-purchase artifacts are attached and verifiable.	**[Pre-Listing]**	Prepares for future failures by documenting how to use warranties.

Task Item	Timing	Description
☐ Resolve `UNKNOWN` related procurement IDs in `WARRANTY_LOG.csv`.	**[Pre-Listing]**	Links warranty logs to specific procurement IDs for clarity.
☐ Warranties/manuals template in `06_Warranties_and_Manuals` is fully operational (not blank).	**[Pre-Listing]**	Ensures the digital repository for manuals is ready for use.
I. Section Release Readiness		
☐ Critical path furnishing items are either purchased or have locked pickup/delivery dates.	**[Pre-Listing]**	Confirms all "must-have" items are secured for the launch.
☐ No unresolved measurement-fit risk remains for entry/hallway.	**[Pre-Listing]**	Eliminates the risk of delivery failures at the entry.
☐ No unresolved hygiene/safety concerns remains for used soft goods.	**[Pre-Listing]**	Guarantees that all items in the home are guest-safe.
☐ Inventory, procurement, shipping, and warranty logs agree on item state.	**[Pre-Listing]**	Validates that all trackers are in agreement before setup.
☐ Section is ready to hand off to `04_Setup_Execution`.	**[Pre-Listing]**	Moves the project from buying to physical installation.
☐ `03_Furnishing_Procurement` formally marked complete.	**[Pre-Listing]**	Formally closes the procurement phase of the roadmap.
Completion Rule		
☐ Mark section complete only when all required items are checked or explicitly marked N/A with reason.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

04 Setup & Execution Master Checklist

Task Item	Timing	Description
A. Timeline and Phase Control		
☐ 30-day launch sequence is actively tracked and on target.	**[Pre-Listing]**	Actively monitors progress against the aggressive one-month goal.
☐ Phase 1 complete: Infrastructure & Prep (Days 1-7).	**[Pre-Listing]**	Finishes the foundational prep work for the property.
☐ Phase 2 complete: Major Furnishings (Days 8-20).	**[Pre-Listing]**	Completes the installation of all primary furniture items.

Task Item	Timing	Description
☐ Phase 3 complete: Smart Home & Safety (Days 21-25).	**[Pre-Listing]**	Sets up the smart home technology and safety equipment.
☐ Phase 4 complete: Staging & Content (Days 26-29).	**[Pre-Listing]**	Finalizes the property aesthetics for photography and launch.
☐ Phase 5 complete: Launch Day final walkthrough and go-live gate.	**[Pre-Listing]**	Marks the final verification before the listing goes live.
☐ Section KPIs are met:	**[Pre-Listing]**	Monitors key project goals for timeline, safety, and visual accuracy.
☐ Speed to market: 30 days.	**[Pre-Listing]**	Measures the efficiency of the setup process against the 30-day target.
☐ Safety compliance: 95%+.	**[Pre-Listing]**	Validates that the property meets almost all safety standards.
☐ Visual accuracy: 100% listing-to-reality alignment.	**[Pre-Listing]**	Ensures the guest's physical experience matches the online photos.
B. Site Prep and Installations (02_Site_Prep_and_Installations)		
☐ Deep clean (pre-furniture) complete.	**[Pre-Listing]**	Prepares the empty home for furniture and guest standards.
☐ Utility verification complete (electric, water, gas, fiber).	**[Pre-Listing]**	Confirms all essential services are active and reliable.
☐ Google Fiber mesh install complete.	**[Pre-Listing]**	Installs high-speed internet with full-home coverage.
☐ Smart lock installed at main entry.	**[Pre-Listing]**	Sets up the primary guest entry system for keyless access.
☐ 50" TV wall mount complete in Primary Bedroom.	**[Pre-Listing]**	Installs the main suite's media amenity securely.
☐ 50" TV wall mount complete in Den.	**[Pre-Listing]**	Equips the flexible space with high-quality media access.
☐ Under-cabinet kitchen lighting installed and warm-toned.	**[Pre-Listing]**	Adds high-end task lighting to the culinary heart.

Task Item	Timing	Description
☐ Great Room patch/paint touch-up complete.	**[Pre-Listing]**	Corrects minor wall defects to ensure a "new" feel.
☐ Garage opener recoded.	**[Pre-Listing]**	Secures the property by resetting external access codes.
☐ Installation tracker table is fully updated with statuses and completion dates.	**[Pre-Listing]**	Keeps a live record of all physical property updates.
C. Furniture and Staging Execution (03_Furniture_and_Staging_Execution)		
☐ 36" mobility path standard verified across all primary routes.	**[Pre-Listing]**	Physically verifies that guests can move freely through the home.
☐ 42" social zone standard verified in Great Room/Kitchen.	**[Pre-Listing]**	Ensures social areas feel spacious rather than crowded.
☐ Great Room staging actions complete (sectional, rug, coffee table clearances).	**[Pre-Listing]**	Executes the layout plan for the primary social area.
☐ Kitchen/Dining staging actions complete (4 stools at 35" intervals, dining clearance).	**[Pre-Listing]**	Sets up the heart of the home for group dining and utility.
☐ Primary Bedroom staging actions complete (bed placement, triple-sheet, rug placement).	**[Pre-Listing]**	Prepares the master suite for a luxury hotel experience.
☐ Hallway staging actions complete (gallery art at 57" on-center and clear run).	**[Pre-Listing]**	Installs the gallery art at the correct eye-level height.
☐ Den staging actions complete (desk orientation and second-screen utility).	**[Pre-Listing]**	Configures the dual-use space for work and relaxation.
☐ Zone progress table is complete for Great Room, Kitchen, Primary, Secondary 1, Secondary 2, and Den.	**[Pre-Listing]**	Tracks the completion status of every room in the home.
D. Room Installation Checklists (INSTALLATION_CHECKLISTS)		
☐ Primary Bedroom checklist complete and signed.	**[Pre-Listing]**	Verifies all tasks for the main suite are 100% complete.
☐ Great Room checklist complete and signed.	**[Pre-Listing]**	Confirms the social hub is fully ready for guests.
☐ Kitchen checklist complete and signed.	**[Pre-Listing]**	Ensures the culinary space is equipped and clean.
☐ Den checklist complete and signed.	**[Pre-Listing]**	Validates the setup of the flexible work/lounge room.

Task Item	Timing	Description
☐ Required clearance/safety checks passed in each room checklist.	**[Pre-Listing]**	Performs a final safety pass on all room-level setups.
☐ TV/media wiring in each applicable room is managed and hidden.	**[Pre-Listing]**	Improves aesthetics and safety by hiding all cables.
E. Smart Home and Tech Deployment (04_Smart_Home_and_Tech_Deployment)		
☐ Device matrix statuses complete for lock, thermostat, smoke/CO, Minut, mesh Wi-Fi, and doorbell cam.	**[Pre-Listing]**	Monitors the setup progress of all smart property devices.
☐ Wi-Fi mesh configured with node placement and guest network isolation.	**[Pre-Listing]**	Eliminates dead zones and provides secure guest internet.
☐ Smart lock auto-lock set to 2 minutes and code workflow tested.	**[Pre-Listing]**	Sets the lock to secure the home automatically after entry.
☐ Physical backup access method verified off-site.	**[Pre-Listing]**	Provides a fail-safe entry method for lock or tech failure.
☐ Minut thresholds configured (75 dB night / 85 dB day) and alert workflow tested.	**[Pre-Listing]**	Configures noise monitoring to prevent neighbor complaints.
☐ Nest thermostat range lock active.	**[Pre-Listing]**	Protects the HVAC system from excessive guest usage.
☐ Speed tests pass in all 3 bedrooms (>100 Mbps).	**[Pre-Listing]**	Guarantees high-speed internet in every bedroom for guests.
☐ Nest Protect interconnect test returns green status.	**[Pre-Listing]**	Verifies that all smoke alarms communicate with each other.
☐ Smart lock battery check passes (100% target at audit).	**[Pre-Listing]**	Ensures the lock is fully powered for the first guest.
☐ Resolve smart-lock model naming inconsistency across docs (Yale/August vs Schlage Encode) and keep one source of truth.	**[Pre-Listing]**	Clarifies technical documentation to avoid future confusion.
F. Staging Standards and Styling Consistency		
☐ Triple-sheet standard is consistent across all sleeping surfaces.	**[Pre-Listing]**	Delivers a consistent, hygienic bedding experience across rooms.

Task Item	Timing	Description
☐ Kitchen social-heart styling standard is applied (stools, decor, coffee bar).	**[Pre-Listing]**	Styles the kitchen to emphasize its role as a gathering space.
☐ Great Room 300" scale styling standard is applied.	**[Pre-Listing]**	Scales the decor to match the property's large social area.
☐ Bathroom hotel-hygiene staging standard is applied.	**[Pre-Listing]**	Sets up bathrooms to meet professional hospitality standards.
☐ Den dual-use (work + lounge) staging standard is applied.	**[Pre-Listing]**	Highlights the room's flexibility for both guests and remote workers.
☐ Final staging audit logic passes symmetry, alignment, and atmosphere checks.	**[Pre-Listing]**	Ensures the entire home feels cohesive and balanced.
G. Final Readiness Audit Gate (05_Final_Readiness_Audit + FINAL_INSPECTION_CHECKLIST)		
☐ Safety and infrastructure checks pass.	**[Pre-Listing]**	Confirms the core house systems are safe and functional.
☐ Smart-home and tech live tests pass.	**[Pre-Listing]**	Validates that all guest technology works as intended.
☐ Staging and aesthetics checks pass.	**[Pre-Listing]**	Final check on the property's visual appeal and brand.
☐ First-hour guest experience checks pass.	**[Pre-Listing]**	Simulates a check-in to identify any friction points.
☐ Failure-mode mitigations are verified:	**[Pre-Listing]**	Confirms fallback systems are ready for Wi-Fi, lock, or HVAC failure.
☐ Wi-Fi dead zone mitigation active.	**[Pre-Listing]**	Confirms that internet coverage is stable throughout.
☐ Lockout backup mitigation active.	**[Pre-Listing]**	Verifies that guests can still enter if tech fails.
☐ HVAC fallback mitigation active.	**[Pre-Listing]**	Ensures climate control is reliable and understood.
☐ Final walkthrough status marked `GREEN` (not `PENDING` or `RE-AUDIT`).	**[Pre-Listing]**	Formally marks the property as ready for its first arrival.
☐ Final inspection checklist fields completed with auditor, date, and score.	**[Pre-Listing]**	Documents the final audit score and approval date.

Task Item	Timing	Description
H. Photography and Media Readiness (06_Content_and_Media_Preparation + MEDIA_PREP_CHECKLIST)		
☐ Whole-home pre-shoot prep complete (windows, flooring, lighting, declutter).	**[Pre-Listing]**	readies every corner of the property for professional media.
☐ Kitchen hero-shot prep complete.	**[Pre-Listing]**	Polishes the most important marketing zone for the camera.
☐ Great Room hero-shot prep complete.	**[Pre-Listing]**	Sets the primary social area for its main listing photo.
☐ Bedroom staging prep complete.	**[Pre-Listing]**	Ensures beds and decor look perfect for the shot.
☐ Bathroom and exterior prep complete.	**[Pre-Listing]**	readies secondary and outdoor spaces for the camera.
☐ Mandatory media shot list is ready (Hero, Hub, Flow, Detail, Amenity).	**[Pre-Listing]**	Ensures no critical marketing perspective is missed.
☐ Photographer access, timing, and deliverables are confirmed.	**[Pre-Listing]**	Coordinates the shoot to capture the best natural light.
☐ Camera-ready pass completed within 2 hours before shoot.	**[Pre-Listing]**	Performs a final dusting and alignment check before the shoot.
I. Launch Handoff		
☐ House manual is finalized, placed, and QR links tested.	**[Pre-Listing]**	Places the physical and digital guide for immediate guest use.
☐ Setup output is handed off to Marketing/Listing for content launch.	**[Pre-Listing]**	Provides the visual assets needed for listing creation.
☐ Setup output is handed off to Operations for turnover standardization.	**[Pre-Listing]**	Sets the standard for future cleaning and turnover.
☐ No unresolved blockers remain in setup execution scope.	**[Pre-Listing]**	Guarantees the property is physically ready for guests.
☐ `04_Setup_Execution` is formally marked complete.	**[Pre-Listing]**	Formally closes the physical setup phase.
Completion Rule		

Task Item	Timing	Description
☐ Mark section complete only when all required items are checked or explicitly marked N/A with rationale.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

05 Operations Master Checklist

Task Item	Timing	Description
A. Operations Strategy and SOP Foundation		
☐ Operations strategy is aligned to `Operational Excellence & Asset Integrity`.	**[Pre-Listing]**	Commits to a high standard of cleanliness and property care.
☐ The 3 operational pillars are active in daily workflow (Sanitation, Staging Accuracy, Incident Velocity).	**[Ongoing]**	Focuses the team on sanitation, staging, and quick response.
☐ `11:00 AM-4:00 PM` Golden Window is enforced for turnover workflow.	**[Ongoing]**	Optimizes the turnover window between guest stays.
☐ Primary cleaning is complete by `2:30 PM` to allow manager walkthrough.	**[Ongoing]**	Allows enough time for a quality check before check-in.
☐ Turnover status is `Green` by `3:30 PM` on check-in days.	**[Ongoing]**	Confirms the property is ready one hour before arrival.
☐ SOP master dependencies are current (turnover, inventory, issue resolution, guest readiness).	**[Pre-Listing]**	Standardizes all recurring operational tasks for consistency.
B. Turnover Protocol Execution (02_Turnover_Protocols + TURNOVER_CHECKLIST)		
☐ Turnover reset is executed to `Day Zero` standard every stay.	**[Post-Listing]**	Returns the property to a "brand new" state after every stay.
☐ Great Room reset complete (sofa, electronics, floor care).	**[Post-Listing]**	Restores the primary social area to listing standards.
☐ Kitchen island reset complete (deep clean + 4 stools at 35" intervals).	**[Post-Listing]**	Deep cleans and re-stages the culinary heart of the home.
☐ Coffee bar restocked to protocol (12 pods and staging standards).	**[Post-Listing]**	Ensures the guest's first morning experience is prepared.
☐ Primary suite reset complete (triple-sheet, towel standards, ensuite polish).	**[Post-Listing]**	Refreshes the main bedroom and bath to luxury standards.

Task Item	Timing	Description
☐ Hallway is 100% zero-obstruction and art alignment is verified.	**[Post-Listing]**	Maintains safety and visual flow throughout the home.
☐ Patio reset complete (debris removed, string lights checked, fire pit secured).	**[Post-Listing]**	Cleans and secures the outdoor area for the next guest.
☐ Tech check complete during turnover (Smart Lock battery, Nest status, Wi-Fi signal).	**[Post-Listing]**	Verifies all smart home devices are functional during turnover.
☐ Final manager walkthrough checks complete (neutral scent, Smart Lock 100%, thermostat set).	**[Post-Listing]**	Provides a final layer of quality control before check-in.
C. Supply and Inventory Control (03_Supply_and_Inventory_Management)		
☐ PAR-level register is actively maintained for all core consumables.	**[Ongoing]**	Prevents stock-outs by tracking consumable levels.
☐ Current counts are updated for coffee pods, TP, paper towels, dish pods, laundry pods, toiletries, and trash bags.	**[Ongoing]**	Maintains live data on all essential guest supplies.
☐ Linen `3x set` protocol is fully maintained for all sleep zones.	**[Ongoing]**	Ensures a clean set is always available during laundry cycles.
Supply action list progress tracked:	**[Pre-Listing]**	Monitors the procurement and setup of initial operational supplies.
☐ Initial 3x hotel-grade linen sets ordered.	**[Pre-Listing]**	Procures the foundational linens needed for launch.
☐ Bulk dispenser pump bottles sourced.	**[Pre-Listing]**	Improves hygiene and aesthetics in the bathrooms.
☐ Subscribe & Save automation configured for core consumables.	**[Pre-Listing]**	Automates the replenishment of high-usage consumables.
☐ Weekly Monday stock audit is being executed.	**[Ongoing]**	Conducts a routine check to prevent supply emergencies.
☐ Reorder trigger is applied when stock is below 50% of PAR.	**[Ongoing]**	Automatically initiates buying when stock reaches a critical level.
☐ Supply purchases are reconciled to procurement records.	**[Ongoing]**	Tracks operational spending for budget management.
D. Task Calendar Compliance (03_Task_Calendar_Tracker)		

Task Item	Timing	Description
☐ `OPS-001` Post-checkout audit executed every turnover.	**[Post-Listing]**	Identifies damage or maintenance needs immediately after stays.
☐ `OPS-002` Full reset cleaning executed every turnover.	**[Post-Listing]**	Executes the primary sanitation task for the property.
☐ `OPS-003` Arrival quality walkthrough executed every turnover.	**[Post-Listing]**	Conducts the final guest-eye check before check-in.
☐ `OPS-004` Coffee/consumables PAR check executed twice weekly.	**[Ongoing]**	Verifies that guests will not run out of essentials.
☐ `OPS-005` Linen rotation and damage check executed weekly.	**[Ongoing]**	Manages the lifecycle and quality of the bedding inventory.
☐ `OPS-006` Smart lock code refresh executed every reservation.	**[Post-Listing]**	Maintains property security by updating guest codes.
☐ `OPS-007` Vendor performance review executed monthly.	**[Ongoing]**	Evaluates the quality and reliability of third-party services.
☐ `OPS-008` Preventive safety check executed monthly.	**[Ongoing]**	Conducts routine checks to avoid catastrophic failures.
☐ Task statuses and next due dates are current.	**[Ongoing]**	Keeps the operational calendar up-to-date and actionable.
E. Vendor and Service Operations (04_Vendor_and_Service_Operations)		
☐ Vendor management tracker is current for all active vendors.	**[Ongoing]**	Maintains contact and status info for all property partners.
☐ Response-time targets are enforceable for critical trades.	**[Ongoing]**	Ensures vendors can meet the property's urgency requirements.
☐ Unique smart-lock code process is used for every vendor visit.	**[Ongoing]**	Tracks vendor entry and exits for security and billing.
☐ License/insurance verification is documented for contractors.	**[Ongoing]**	Protects the owner by vetting contractor credentials.
☐ Utility account metadata and auto-pay flags are completed.	**[Pre-Listing]**	Organizes access and payment info for all house services.

Task Item	Timing	Description
☐ Vendor access SOP is followed (request, assign, verify photo proof, pay/log).	**[Ongoing]**	Standardizes how contractors are requested and paid.
F. Incident and Resolution Control (05_Incident_and_Resolution_Log)		
☐ Incident tracker is updated for all new events with severity and owner.	**[Ongoing]**	Logs all property issues and guest complaints for resolution.
☐ Critical/high/medium/low triage SLAs are followed.	**[Ongoing]**	Prioritizes responses based on the severity of the issue.
☐ Medium/high incidents are cross-referenced into maintenance repair tickets.	**[Ongoing]**	Links operational issues to permanent physical repairs.
☐ Weekly incident review is completed for recurrence pattern detection.	**[Ongoing]**	Analyzes patterns to prevent recurring property problems.
☐ Open incidents have active next action and owner.	**[Ongoing]**	Ensures every current issue has a clear owner and path to fix.
☐ In-progress incidents have ETA and vendor accountability documented.	**[Ongoing]**	Monitors vendor timelines for active property repairs.
☐ Resolved incidents include resolution date, cost, and evidence.	**[Ongoing]**	Records the completion and cost of property fixes.
☐ High-severity or >$250 escalation rule is enforced.	**[Ongoing]**	Ensures major issues are immediately handled by the owner.
G. Operational Checklists Gate (06_Operational_Checklists)		
☐ Arrival Quality Checklist is completed after cleaner departure.	**[Post-Listing]**	Validates the property is guest-ready after cleaning.
☐ Entry/hall first-impression checks pass.	**[Post-Listing]**	Confirms the property's first impression is high-quality.
☐ Kitchen/Great Room social hub checks pass.	**[Post-Listing]**	Verifies the social areas are clean and functional.
☐ Sleep-zone checks pass.	**[Post-Listing]**	Ensures bedrooms are hygienic and inviting for guests.
☐ Functional/utility checks pass (baths, temp, safety).	**[Post-Listing]**	Confirms that bathrooms, climate, and safety are operational.

Task Item	Timing	Description
☐ Austin vibe checks pass (art, house manual, welcome touch).	**[Post-Listing]**	Verifies the decorative "Austin" touches are in place.
☐ Turnover Day Quick Checklist is completed on phone before check-in.	**[Post-Listing]**	Conducts a final rapid check on mobile before check-in.
☐ Any `No` is resolved before marking `Go`.	**[Post-Listing]**	Prevents guests from finding issues by fixing them first.
☐ Final go/no-go decision is logged with date, checker, and notes.	**[Post-Listing]**	Formally authorizes the guest check-in based on audit.
H. Cross-System Consistency		
☐ Turnover, supply, incident, and vendor records are consistent with each other.	**[Ongoing]**	Ensures all operational logs reflect the same property state.
☐ Operations documents align with setup/staging standards from `04_Setup_Execution`.	**[Ongoing]**	Maintains the high standard set during the physical setup.
☐ Operations controls align with guest-quality standards from `06_Guest_Experience`.	**[Ongoing]**	Protects the guest experience through rigorous backend rules.
☐ Operations controls align with maintenance loops in `10_Maintenance`.	**[Ongoing]**	Feeds operational findings into long-term upkeep.
I. Final Section Readiness		
☐ No unresolved operational blocker remains for next guest arrival.	**[Ongoing]**	Guarantees a smooth experience for the next guest.
☐ Core SLA targets are met (<1 hour response communication, <4 hour critical vendor response).	**[Ongoing]**	Confirms the team can respond within project timelines.
☐ Stock-out risk is controlled for all guest-critical items.	**[Ongoing]**	Ensures guests will have all promised amenities.
☐ Daily operations can run without ad hoc workarounds.	**[Ongoing]**	Validates that the turnover system is sustainable.
☐ `05_Operations` is formally marked complete.	**[Pre-Listing]**	Formally marks the operations section as ready for launch.
Completion Rule		
☐ Mark section complete only when all required items are checked or explicitly marked N/A with rationale.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

06 Guest Experience Master Checklist

Task Item	Timing	Description
A. Hospitality Strategy Alignment		
☐ Guest experience strategy is aligned to `Frictionless Austin Retreat`.	**[Pre-Listing]**	Focuses on a seamless, high-quality stay for every visitor.
☐ Core principle is enforced: guest should not need to ask first.	**[Ongoing]**	Aims to provide all info and amenities proactively.
☐ Three service pillars are operational:	**[Pre-Listing]**	Executes digital clarity, operational ease, and proactive engagement.
☐ Digital Clarity (pre-arrival confidence).	**[Pre-Listing]**	Builds guest trust through clear pre-stay communication.
☐ Operational Ease (intuitive stay experience).	**[Pre-Listing]**	Designs the physical stay to be intuitive and frictionless.
☐ Proactive Engagement (feedback loop during stay).	**[Pre-Listing]**	Actively seeks guest feedback to improve future stays.
☐ Guest journey stages are fully covered (Pre-Booking, Pre-Arrival, Check-In, During Stay, Check-Out, Post-Stay).	**[Pre-Listing]**	Covers every touchpoint from booking through reviews.
☐ Experience KPIs are actively tracked:	**[Ongoing]**	Monitors response time, review scores, and lock success rates.
☐ Response time under 30 minutes.	**[Ongoing]**	Commits to rapid communication for high guest satisfaction.
☐ Review average 4.9+.	**[Ongoing]**	Sets a high-performance goal for platform rankings.
☐ First-attempt smart-lock success at 100%.	**[Ongoing]**	Aims for 100% success at entry to avoid frustration.
B. House Manual and Safety Readiness (01_House_Manual)		
☐ House Manual is complete, current, and physically placed in Great Room.	**[Pre-Listing]**	Provides the definitive guide for the property's use.
☐ Wi-Fi SSID/password and QR access are accurate.	**[Pre-Listing]**	Ensures guests can connect to high-speed internet immediately.
☐ Entry instructions are clear for 60" smart-lock flow.	**[Pre-Listing]**	Clarifies the smart-lock process for a smooth arrival.

Task Item	Timing	Description
☐ House rules are clear (no smoking, no parties, quiet hours).	**[Pre-Listing]**	Protects the property by setting clear behavioral expectations.
☐ Emergency contacts are complete and verified.	**[Pre-Listing]**	Provides guests with immediate help resources if needed.
☐ Replace placeholders (e.g., STR license placeholder, station placeholder, host phone placeholder).	**[Pre-Listing]**	Finalizes the manual by adding real property-specific data.
☐ Safety guide implementation checks are complete:	**[Ongoing]**	Verifies fire alarms, medical kits, and clear exit paths.
☐ Monthly Nest Protect testing.	**[Ongoing]**	Ensures life-safety systems are functional year-round.
☐ First-aid kit seal verification.	**[Ongoing]**	Confirms emergency medical supplies are ready for use.
☐ 36" egress path verification.	**[Pre-Listing]**	Physically verifies that exit routes remain clear for guests.
C. Check-In / Check-Out Operations (02_Checkin_Checkout)		
☐ Check-in guide is synchronized with operational standards (4 PM check-in, smart entry, walkthrough prompt).	**[Pre-Listing]**	Aligns the guest arrival process with operational reality.
☐ Checkout instructions are clear, minimal, and consistent across docs and templates.	**[Pre-Listing]**	Minimizes guest effort while ensuring property security.
☐ Departure task list is complete and guest-friendly.	**[Pre-Listing]**	Provides a friendly guide for guests leaving the home.
☐ Cleaning quality standard is enforced for all zones.	**[Ongoing]**	Enforces professional hygiene for every guest arrival.
☐ Turnover checklist items in cleaning quality standard are operational:	**[Ongoing]**	Confirms fridge, smart lock, and thermostat status.
☐ Fridge clear of perishables.	**[Ongoing]**	Ensures no leftover items from previous guests remain.
☐ Smart-lock wipe-down.	**[Ongoing]**	Maintains sanitation on high-touch entry points.
☐ Nest thermostat reset.	**[Ongoing]**	Returns climate control to a comfortable baseline for arrivals.

Task Item	Timing	Description
☐ `02_Checkin_Checkout_Tracker` is current for all bookings.	**[Ongoing]**	Monitors the flow of guests through the property.
☐ `code_sent` is confirmed for upcoming stays.	**[Post-Listing]**	Verifies that entry codes have been successfully delivered.
☐ Pending-code records are resolved before arrival.	**[Post-Listing]**	Resolves any delivery issues before the guest arrives.
D. Amenities Control (03_Amenities)		
☐ Amenities tracker includes all critical guest-facing amenities by zone.	**[Pre-Listing]**	Catalogs every guest-facing feature for listing accuracy.
☐ All `AM-001` through `AM-018` records are status-updated.	**[Pre-Listing]**	Updates the status and condition of all property amenities.
☐ `photo_verified` is updated from `No` to actual state for each amenity.	**[Pre-Listing]**	Confirms that every amenity is visually documented for marketing.
☐ `platform_listed` is updated from `No` to actual state for each amenity.	**[Pre-Listing]**	Ensures the online listing accurately reflects physical amenities.
☐ Amenities listed on platforms match physical reality.	**[Pre-Listing]**	Prevents negative reviews by avoiding false promises.
E. Guest Communications System (04_Guest_Comms_Templates + MESSAGE_TEMPLATES)		
☐ Comms master playbook sequence is active.	**[Pre-Listing]**	Standardizes the entire guest messaging sequence.
☐ Booking confirmation message is loaded and usable.	**[Pre-Listing]**	Sets the tone and confirms the stay details immediately.
☐ Pre-arrival message is sent exactly 24 hours prior.	**[Pre-Listing]**	Delivers critical access info 24 hours before check-in.
☐ Hour-one check-in message is triggered correctly.	**[Pre-Listing]**	Confirms the guest has entered successfully and is happy.
☐ Mid-stay check-in message is triggered correctly for eligible stays.	**[Pre-Listing]**	Proactively addresses any issues during longer stays.
☐ Checkout instructions are sent exactly 18 hours before departure.	**[Pre-Listing]**	Reminds guests of departure tasks to aid turnover.

Task Item	Timing	Description
☐ Review request is sent 2 hours post-checkout when criteria are met.	**[Pre-Listing]**	Encourages positive feedback immediately after a good stay.
☐ All message templates are loaded into PMS/automation system.	**[Pre-Listing]**	Automates the communication workflow for efficiency.
☐ Personalization fields tested and error-free.	**[Pre-Listing]**	Ensures automated messages feel human and accurate.
☐ `04_Guest_Comms_Templates_Tracker` is current and next actions are on schedule.	**[Ongoing]**	Monitors the execution of the messaging schedule.
F. Reviews and Feedback Management (05_Reviews_Feedback + REVIEW_STRATEGY)		
☐ Reviews strategy target is active (4.9+ or better).	**[Ongoing]**	Focuses efforts on maintaining a top-tier platform rating.
☐ Proactive feedback loops are implemented (Hour One, Mid-Stay, Post-Stay).	**[Ongoing]**	Catches issues early before they become bad reviews.
☐ Review generation workflow is automated and time-accurate.	**[Ongoing]**	Drives a high volume of positive reviews automatically.
☐ Negative review prevention actions are in place (Wi-Fi, climate, access friction controls).	**[Ongoing]**	Addresses common friction points before guests notice.
☐ Issue recovery protocol is enforced:	**[Ongoing]**	Commits to rapid response and recovery for guest issues.
☐ Complaint acknowledgment within 15-30 minutes.	**[Ongoing]**	Commits to rapid response for guest issues.
☐ Immediate resolution path initiated.	**[Ongoing]**	Prioritizes fixing guest problems over all other tasks.
☐ Service recovery gesture rules applied when impact is significant.	**[Ongoing]**	Rebuilds guest trust after significant property failures.
☐ Monthly review audit process is active for trend analysis.	**[Ongoing]**	Analyzes feedback to identify long-term improvement areas.
☐ Feedback loop into Operations/Setup/Enhancement roadmap is documented.	**[Ongoing]**	Uses guest data to refine the property's operational standards.
G. Welcome Kit and In-Stay Presentation		
☐ Physical welcome kit items are stocked and placed correctly.	**[Ongoing]**	Provides a high-impact first impression for guests.
☐ House manual binder and Wi-Fi acrylic stand are clean and visible.	**[Pre-Listing]**	Ensures the property guide is clean and easy to find.

Task Item	Timing	Description
☐ Coffee/tea/condiment setup is stocked and presentation-ready.	**[Ongoing]**	Sets up the morning routine for immediate guest enjoyment.
☐ Bathroom amenity dispensers are filled and aligned.	**[Ongoing]**	Delivers a hotel-like experience with consistent hygiene.
☐ Digital welcome flow is active (Hour-One confirmation message).	**[Ongoing]**	Validates that the guest has arrived and is comfortable.
H. Experience Enhancements Backlog Control		
☐ Enhancement opportunities are prioritized and tracked.	**[Ongoing]**	Tracks future ideas for improving the guest experience.
☐ Remote work kit decision documented.	**[Pre-Listing]**	Decides if adding monitors/keyboards adds guest value.
☐ Austin-local coffee program decision documented.	**[Pre-Listing]**	Evaluates using local brands to improve the property vibe.
☐ Checkout button automation decision documented.	**[Pre-Listing]**	Considers automation to signal cleaners immediately on departure.
☐ Chosen enhancements have implementation owners and timing.	**[Ongoing]**	Assigns accountability for new experience features.
I. Cross-Section Consistency and Final Readiness		
☐ Guest experience docs are consistent with `04_Setup_Execution` staging/tech standards.	**[Pre-Listing]**	Ensures the manual matches the physical house.
☐ Guest experience docs are consistent with `05_Operations` turnover and readiness checks.	**[Pre-Listing]**	Synchronizes cleaning with guest expectations.
☐ Guest-facing promises match actual amenities and procedures.	**[Pre-Listing]**	Eliminates gaps between the listing and reality.
☐ No unresolved high-friction point remains in journey map.	**[Pre-Listing]**	Identifies and fixes any annoying parts of the stay.
☐ `06_Guest_Experience` is formally marked complete.	**[Pre-Listing]**	Formally closes the guest experience phase.
Completion Rule		

Task Item	Timing	Description
☐ Mark section complete only when all required items are checked or explicitly marked N/A with rationale.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

07 Marketing & Listing Master Checklist

Task Item	Timing	Description
A. Strategy and KPI Alignment		
☐ Marketing strategy is aligned to `Conversion-First Visual Storytelling`.	**[Pre-Listing]**	Prioritizes visuals and storytelling to drive bookings.
☐ The 3 marketing pillars are operational (Visual Hook, Narrative Proof, SEO Velocity).	**[Ongoing]**	Focuses on catching eyes, proving quality, and SEO rank.
☐ Property value propositions are consistently represented (142" island, 158" hallway, 300" great room, 468" patio).	**[Pre-Listing]**	Highlights the home's unique dimensions and scale.
☐ KPI targets are defined and tracked:	**[Ongoing]**	Sets measurable goals for marketing performance.
☐ CTR target >3% in first 30 days.	**[Ongoing]**	Measures the effectiveness of the hero image and title.
☐ Booking conversion target 2.5%-3.5%.	**[Ongoing]**	Tracks how many visitors turn into actual guests.
☐ Inquiry response target <30 minutes.	**[Ongoing]**	Commits to fast replies to secure potential bookings.
B. Photos and Video Pipeline (01_Photos_Video)		
☐ Top 5 hero matrix shots are captured and usable.	**[Pre-Listing]**	Secures the most important images for the listing's start.
☐ Great Room shot requirements complete.	**[Pre-Listing]**	Captures the main social space's scale and light.
☐ Kitchen/Island shot requirements complete.	**[Pre-Listing]**	Highlights the home's central culinary amenity.
☐ 158" hallway perspective and detail shots complete.	**[Pre-Listing]**	Showcases the architectural scale of the property.
☐ Patio daytime + twilight + detail shots complete.	**[Pre-Listing]**	Displays the outdoor lifestyle and atmosphere.
☐ Failure-mode checks are complete (no dark/grainy assets, no missing hero set, styling consistency confirmed).	**[Pre-Listing]**	Ensures only professional, high-quality assets are used.

Task Item	Timing	Description
☐ `01_Photos_Video_Tracker` rows `PV-001` to `PV-035` are status-updated.	**[Pre-Listing]**	Tracks the status of every planned marketing shot.
☐ `approved_for_photos` is resolved for each asset.	**[Pre-Listing]**	Confirms that rooms were ready before shots were taken.
☐ `captured`, `edited`, and `platform_ready` fields are updated accurately.	**[Pre-Listing]**	Monitors the production flow of the visual assets.
C. Listing Copy Readiness (02_Listing_Copy)		
☐ Airbnb copy is finalized and accurate.	**[Pre-Listing]**	Delivers a high-converting description for the main platform.
☐ VRBO copy is finalized and accurate.	**[Pre-Listing]**	Tailors the property story for the VRBO audience.
☐ Measurement-backed claims are consistent across platforms.	**[Pre-Listing]**	Uses facts to build guest trust and set expectations.
☐ Sleeping configuration details are correct and consistent.	**[Pre-Listing]**	accurately describes bed counts and room layouts.
☐ Guest access/entry instructions are consistent with smart-lock workflow.	**[Pre-Listing]**	Synchronizes the listing info with the actual house manual.
☐ Good-fit audience framing aligns with strategy personas.	**[Pre-Listing]**	Uses language that attracts the intended guest segments.
☐ No claim in copy lacks supporting photo or amenity evidence.	**[Pre-Listing]**	Ensures all marketing promises are backed by proof.
D. Channel Setup and Launch Gate (03_Channel_Setup)		
☐ Stage 1 complete: all rooms approved for photos and no unresolved staging notes.	**[Pre-Listing]**	Verifies the property is visually ready for listing.
☐ Stage 2 complete: shot capture complete with required scale shots and twilight minimums.	**[Pre-Listing]**	Captures all required media assets for the platforms.
☐ Stage 3 complete: color consistency pass, 25-35 final images, filename standardization.	**[Pre-Listing]**	Finalizes the editing and standardization of photos.
☐ Stage 4 complete: copy-photo alignment and measurement references are confirmed.	**[Pre-Listing]**	Integrates copy and measurements for a complete listing.
☐ Stage 5 complete: hero sequencing, license display, and platform self-audit.	**[Pre-Listing]**	Conducts the final pre-publish audit of the channels.

Task Item	Timing	Description
☐ `03_Channel_Setup_Tracker` is current for Airbnb, VRBO, and channel manager.	**[Pre-Listing]**	Monitors the readiness of all booking platforms.
☐ All `required_for_launch = Yes` items are complete.	**[Pre-Listing]**	Ensures no critical listing task is missed.
☐ Pending steps (copy upload, photo upload, pricing config, house manual link, sync) are resolved.	**[Pre-Listing]**	Clears the final technical hurdles before go-live.
☐ iCal/API sync is tested for zero double-booking risk.	**[Pre-Listing]**	Prevents double-bookings through automated calendar sync.
E. SEO Implementation (04_SEO_Keywords)		
☐ SEO playbook rules are followed by section (title, about, space, captions).	**[Pre-Listing]**	Optimizes the listing for platform search algorithms.
☐ Approved keyword clusters are reflected in live copy naturally.	**[Pre-Listing]**	Uses high-traffic terms to improve property visibility.
☐ Keyword stuffing is avoided and readability remains guest-first.	**[Pre-Listing]**	Keeps the copy natural and readable for guests.
☐ Keywords map only to verified features and amenities.	**[Pre-Listing]**	Protects credibility by using accurate search terms.
☐ `04_SEO_Keywords_Tracker` is updated for all rows `KW-001` to `KW-015`.	**[Pre-Listing]**	Monitors keyword usage across the listing sections.
☐ `current_used` and `target_usage_count` are reconciled.	**[Pre-Listing]**	Reconciles the intended strategy with the actual live copy.
☐ `KW-012` proximity keyword is used only if factually accurate.	**[Pre-Listing]**	Ensures location claims are factually correct.
☐ Monthly and seasonal keyword review cadence is active.	**[Ongoing]**	Keeps the listing optimized for changing search trends.
F. Promotions and Velocity Control (05_Promotions)		
☐ Promotions playbook rules are configured by launch/near-term/long-stay logic.	**[Pre-Listing]**	Applies logic-based discounts to drive early booking volume.
☐ Guardrails are enforced (no discounting during peak events; discount caps observed).	**[Ongoing]**	Protects revenue by limiting discounts during peak periods.

Task Item	Timing	Description
☐ Failure-mode monitoring is active (over-discounting, pace stagnation, low-quality guest risk).	**[Ongoing]**	Watches for signs of over-discounting or low booking pace.
☐ `05_Promotions_Tracker` rows `PRM-001` to `PRM-005` are current.	**[Ongoing]**	Tracks the performance and status of active discounts.
☐ Promotion stacking conflicts are prevented.	**[Ongoing]**	Ensures multiple discounts don't erode all profit.
☐ Promotions are aligned with cleaner capacity and operational constraints.	**[Ongoing]**	Prevents bookings the cleaning team can't handle.
☐ Weekly and monthly performance review rhythm is active.	**[Ongoing]**	Evaluates the ROI of active marketing promotions.
G. Platform Optimization and Testing		
☐ Airbnb title and photo order follow optimization logic.	**[Pre-Listing]**	Uses data-driven logic to order listing content.
☐ VRBO title/content/photo order follow optimization logic.	**[Pre-Listing]**	Tailors the VRBO listing for its specific search logic.
☐ Amenity filters are correctly selected on each platform.	**[Pre-Listing]**	Ensures the property appears in filtered guest searches.
☐ A/B test plan exists for title, hero image, and opening copy.	**[Pre-Listing]**	Prepares to test different marketing hooks for better results.
☐ Performance feedback loop is defined for low CTR / low conversion diagnosis.	**[Ongoing]**	Diagnoses why a listing might be underperforming.
H. Publish Quality Assurance		
☐ Visual/story flow matches intended virtual walkthrough.	**[Pre-Listing]**	Simulates the guest's digital walkthrough of the property.
☐ First 5 images prove the positioning clearly.	**[Pre-Listing]**	Focuses on the most impactful shots for quick conversion.
☐ House rules and STR license display requirements are satisfied.	**[Pre-Listing]**	Meets platform and local legal requirements for display.
☐ Listing metadata and copy are free of placeholder text/errors.	**[Pre-Listing]**	Ensures every field is professional and error-free.
☐ Final mobile and desktop preview review is complete for Airbnb and VRBO.	**[Pre-Listing]**	Verifies the listing looks great on all guest devices.

Task Item	Timing	Description
I. Final Section Readiness		
☐ Photos, copy, SEO, channel setup, and promotions are all launch-ready.	**[Pre-Listing]**	Confirms all marketing components are ready for launch.
☐ No unresolved blocker remains in trackers.	**[Pre-Listing]**	Ensures a smooth transition to the live booking phase.
☐ Section is ready to hand off to pricing/revenue and analytics monitoring.	**[Pre-Listing]**	Moves the project from marketing to revenue management.
☐ `07_Marketing_Listing` is formally marked complete.	**[Pre-Listing]**	Formally marks the marketing phase as finished.
Completion Rule		
☐ Mark section complete only when all required items are checked or explicitly marked N/A with rationale.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

08 Pricing & Revenue Master Checklist

Task Item	Timing	Description
A. Revenue Strategy and Guardrails		
☐ Revenue strategy is aligned to `Balanced Yield`.	**[Pre-Listing]**	Commits to a balanced approach between occupancy and daily rate.
☐ Three pillars are active in execution (Velocity, Yield, Asset Integrity).	**[Ongoing]**	Focuses on booking speed, total yield, and property safety.
☐ Occupancy target range is enforced (`75-80%`).	**[Ongoing]**	Aims for a healthy 75-80% booking rate.
☐ Financial guardrails are enforced:	**[Pre-Listing]**	Limits floor and ceiling rates to protect profit and competitiveness.
☐ Absolute floor rate `$165`.	**[Pre-Listing]**	Protects the property from low-value bookings that damage profit.
☐ Normal ceiling `$325`.	**[Pre-Listing]**	Sets the maximum price for standard high-demand periods.
☐ Peak event ceiling `$450`.	**[Pre-Listing]**	Capitalizes on major Austin events with premium pricing.

Task Item	Timing	Description
☐ Event trigger table is configured (SXSW, ACL, F1, UT games, graduations).	**[Pre-Listing]**	Prepares the calendar for high-revenue holiday and event dates.
B. Rate Strategy Baseline (01_Rate_Strategy)		
☐ Base weekday rate `$215` is configured.	**[Pre-Listing]**	Establishes the starting price for mid-week stays.
☐ Base weekend rate `$245` is configured.	**[Pre-Listing]**	Sets the higher baseline for high-demand weekend nights.
☐ Smart pricing floor at `$165` is enabled.	**[Pre-Listing]**	Enables automated pricing with a firm safety limit.
☐ Weekend premium rule (`+12%`) is active and verified.	**[Pre-Listing]**	Automatically adds a 12% markup for weekend stays.
☐ Event premiums are applied per documented mandate.	**[Pre-Listing]**	Ensures higher rates are live for all major local events.
☐ Rate sync is complete across Airbnb and VRBO calendars.	**[Pre-Listing]**	Validates that prices are consistent across all booking channels.
C. Dynamic Pricing Control (02_Dynamic_Pricing + Rules)		
☐ `DP-001` Weekend Premium is active and functioning.	**[Pre-Listing]**	Automatically adjusts rates for higher weekend demand.
☐ `DP-002` Near-Term Gap Fill is configured and ready.	**[Pre-Listing]**	Drives bookings for empty upcoming nights with discounts.
☐ `DP-003` Long-Stay Yield rule is configured and ready.	**[Pre-Listing]**	Encourages longer bookings while maintaining profit.
☐ `DP-004` High-Demand Manual Override is set with clear enable criteria.	**[Pre-Listing]**	Allows for human intervention during unique market spikes.
☐ `DP-005` Low-Pace Recovery review cadence.	**[Ongoing]**	Triggers a strategy shift if bookings fall behind target.
☐ Dynamic rule constraints are enforced:	**[Pre-Listing]**	Ensures rules respect floors, ceilings, and other discount layers.
☐ Never below `$165` floor.	**[Pre-Listing]**	Ensures automated rules don't cut prices too deeply.
☐ Never above `$450` ceiling.	**[Pre-Listing]**	Prevents price gouging or uncompetitive high rates.

Task Item	Timing	Description
☐ No unintended overlap with other discount layers.	**[Pre-Listing]**	Keeps the pricing logic simple and predictable.
☐ Weekly near-term pacing review (next 14 days) is active.	**[Ongoing]**	Actively manages the immediate booking calendar.
D. Discounts and Fees Guardrails (03_Discounts_Fees)		
☐ `DF-001` max promo cap (`15%`) is active.	**[Pre-Listing]**	Limits the maximum possible discount to protect yield.
☐ `DF-002` no-stacking policy is active.	**[Pre-Listing]**	Prevents guests from combining multiple discounts.
☐ Weekly discount rule is configured with 7+ night intent.	**[Pre-Listing]**	Targets guests seeking a full week stay with better rates.
☐ Monthly discount rule has explicit enable criteria before activation.	**[Pre-Listing]**	Prepares a strategy for long-term "remote work" stays.
☐ Last-minute discount rule aligns with gap-fill strategy.	**[Pre-Listing]**	Maximizes revenue by filling rooms that would otherwise go empty.
☐ Early check-in value-add is tied to ops capacity.	**[Pre-Listing]**	Monetizes or uses early access to improve guest satisfaction.
☐ Discount logic does not conflict with pricing floor/ceiling guardrails.	**[Pre-Listing]**	Verifies that all rules respect the house price floors.
E. Occupancy and Pricing Performance Analysis		
☐ Weekly occupancy pace is evaluated against target.	**[Ongoing]**	Compares actual bookings to the property's performance goals.
☐ Low occupancy windows (<60%) are identified and diagnosed.	**[Ongoing]**	Identifies upcoming slow periods for targeted marketing.
☐ Event pricing performance is validated (yield vs occupancy).	**[Ongoing]**	Measures if the property successfully captured event revenue.
☐ Weekend premium performance is validated.	**[Ongoing]**	Validates if the weekend markup is being accepted by guests.
☐ Orphan-day mitigation logic is applied when relevant.	**[Ongoing]**	Develops tactics to fill single-night gaps in the calendar.
☐ Pricing-performance mismatches are documented with actions.	**[Ongoing]**	Corrects any rates that are out of sync with the market.
F. Revenue Reporting (04_Revenue_Reports)		

Task Item	Timing	Description
☐ Monthly report metadata is complete (month, prepared date).	**[Ongoing]**	Maintains organized records of property financial performance.
☐ Revenue summary table is populated (gross, net, fees, taxes, variance).	**[Ongoing]**	Provides a clear view of total income and expenses.
☐ KPI snapshot is populated (occupancy, ADR, RevPAR, avg stay).	**[Ongoing]**	Summarizes the key metrics driving the property's revenue.
☐ Financial leakage checks are completed:	**[Ongoing]**	Verifies platform payouts, peak window efficiency, and utilities.
☐ Platform variance reconciled.	**[Ongoing]**	Identifies any discrepancies between platform reports and bank deposits.
☐ Peak-window monitoring complete.	**[Ongoing]**	Ensures the property maximizes income during high-demand dates.
☐ Utility efficiency check complete.	**[Ongoing]**	Monitors house costs to protect net profit margins.
☐ Next-month actions are defined for pricing, promotion, and reconciliation.	**[Ongoing]**	Sets the revenue management strategy for the upcoming period.
G. Payout Reconciliation Integrity (05_Payout_Reconciliation)		
☐ Reconciliation tracker has complete rows for each channel/period.	**[Post-Listing]**	Matches every booking to a corresponding bank deposit.
☐ `gross_booking_usd`, fees, taxes, net payout, bank received are populated from actuals.	**[Post-Listing]**	Records the actual financial data for every guest stay.
☐ `variance_usd` is calculated and explained where non-zero.	**[Post-Listing]**	Highlights and explains any missing or extra funds.
☐ Baseline/planned rows are updated to actual status post-cycle.	**[Post-Listing]**	Updates financial forecasts with real-world outcomes.
☐ Any payout variance is escalated and resolved with platform support.	**[Post-Listing]**	Resolves financial errors with platform support teams.
H. Cross-System Data Consistency		
☐ Revenue tracker fields are actively maintained (not blank placeholders).	**[Ongoing]**	Ensures the financial spreadsheet is a reliable source of truth.
☐ Pricing decisions align with marketing promotions and channel setup.	**[Ongoing]**	Coordinates discounts with the overall brand story.

Task Item	Timing	Description
☐ Pricing/discount rules align with analytics KPIs and occupancy tracker.	**[Ongoing]**	Uses performance data to set future rates.
☐ Tax and payout handling aligns with compliance requirements.	**[Ongoing]**	Ensures financial tracking meets all legal requirements.
I. Final Section Readiness		
☐ Floors, ceilings, event premiums, and discount caps are live and tested.	**[Pre-Listing]**	Confirms all pricing rules are active and tested.
☐ Dynamic pricing and channel synchronization are operational.	**[Pre-Listing]**	Validates that the revenue tech stack is operational.
☐ Reporting and payout reconciliation workflow is operational end-to-end.	**[Post-Listing]**	Ensures the financial tracking system is ready for use.
☐ No unresolved financial-control blocker remains.	**[Ongoing]**	Guarantees that the money management system is solid.
☐ `08_Pricing_Revenue` is formally marked complete.	**[Pre-Listing]**	Formally marks the pricing phase as ready for launch.
Completion Rule		
☐ Mark section complete only when all required items are checked or explicitly marked N/A with rationale.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

09 Legal & Compliance Master Checklist

Task Item	Timing	Description
A. Compliance Strategy and Risk Shield		
☐ Compliance posture is aligned to `Defense-in-Depth`.	**[Pre-Listing]**	Adopts a rigorous, multi-layered approach to legal safety.
☐ Four compliance pillars are active (Permitting/Licensing, Taxation, Insurance, Local Rules).	**[Pre-Listing]**	Focuses on licensing, taxes, insurance, and local laws.
☐ Compliance KPIs are active:	**[Ongoing]**	Monitors license status, tax accuracy, and violation count.
☐ License status = 100% active.	**[Ongoing]**	Commits to 100% legal operation at all times.
☐ Tax variance <1%.	**[Ongoing]**	Aims for perfect accuracy in tax reporting and payments.

Task Item	Timing	Description
☐ Violation count = 0.	**[Ongoing]**	Sets a goal of zero legal or regulatory infractions.
B. Licenses and Permits (01_Licenses_Permits)		
☐ `LCP-001` STR Operating Permit is verified and approved.	**[Pre-Listing]**	Secures the primary legal right to rent the property.
☐ STR permit type is confirmed (Type 1 vs Type 2) with official source.	**[Pre-Listing]**	ensures the property is registered under the correct category.
☐ Permit number, issue date, and renewal date are populated.	**[Pre-Listing]**	Documents the key details of the operating license.
☐ `LCP-002` Certificate of Occupancy requirement is verified and documented.	**[Pre-Listing]**	Verifies the building is legally cleared for guest use.
☐ `LCP-003` business registration requirement is verified and documented.	**[Pre-Listing]**	Ensures the rental activity is properly registered with the state.
☐ `LCP-004` fire safety compliance requirement is verified and documented.	**[Pre-Listing]**	Validates that the property meets all local fire code rules.
☐ All permit tracker rows are moved out of `Researching`/`TBD` to verified states.	**[Pre-Listing]**	Moves legal research from "TBD" to verified facts.
C. Insurance Coverage (02_Insurance)		
☐ Homeowners policy STR allowance is explicitly confirmed.	**[Pre-Listing]**	Confirms the primary insurance knows about the rental use.
☐ STR/commercial liability coverage is active at `$1M+` minimum.	**[Pre-Listing]**	Provides high-level protection for guest-related injuries.
☐ Loss-of-income/business interruption coverage is active.	**[Pre-Listing]**	Protects the owner's revenue if the property becomes unrentable.
☐ Umbrella liability decision is documented (active or intentionally deferred).	**[Pre-Listing]**	Decides on an extra layer of financial protection for the business.
☐ Carrier, policy number, limits, deductibles, effective dates, and renewals are populated.	**[Pre-Listing]**	Maintains organized records for all property insurance.
☐ `str_endorsement_confirmed` reflects true state for applicable policies.	**[Pre-Listing]**	Verifies that the insurance actually covers short-term rentals.

Task Item	Timing	Description
☐ Insurance stack no longer has critical `Researching`/`TBD` gaps.	**[Pre-Listing]**	Ensures there are no dangerous gaps in the property's coverage.
D. Tax Registration and Filing (03_Tax_Documents)		
☐ Texas HOT registration is complete and verified.	**[Pre-Listing]**	Sets up the required state-level hotel occupancy tax account.
☐ Austin HOT registration is complete and verified.	**[Pre-Listing]**	Sets up the required city-level hotel occupancy tax account.
☐ Filing frequency and due-day cadence are documented.	**[Ongoing]**	Establishes the schedule for recurring tax payments.
☐ Account references are populated for each required tax item.	**[Ongoing]**	Links tax tracking to specific government account IDs.
☐ Next filing due dates are populated.	**[Ongoing]**	Prevents penalties by tracking upcoming tax deadlines.
☐ Platform tax collection behavior is verified against legal requirements.	**[Pre-Listing]**	Verifies that Airbnb/VRBO are handling taxes correctly.
☐ Monthly reconciliation tie-out exists with revenue reporting.	**[Ongoing]**	Matches tax records with property revenue for accuracy.
E. Regulations and HOA Compliance (04_Regulations_HOA)		
☐ STR permission at property address is verified from official source.	**[Pre-Listing]**	Physically verifies that the specific lot can be an STR.
☐ Occupancy cap is verified and aligned to strictest enforceable limit.	**[Pre-Listing]**	Ensures the house rules don't exceed legal guest limits.
☐ Austin Code 25-2-511 handling is documented in guest-facing materials.	**[Pre-Listing]**	Provides mandatory legal info to guests to avoid violations.
☐ Noise rules are documented and mapped to enforcement tooling.	**[Pre-Listing]**	Sets clear legal boundaries for guest behavior.
☐ Parking rules are verified and guest-facing language is updated.	**[Pre-Listing]**	Prevents neighborhood complaints by managing guest vehicles.
☐ Trash/collection rules are verified and operationalized.	**[Pre-Listing]**	Aligns guest waste disposal with local municipal rules.
☐ `04_Regulations_HOA_Tracker` statuses are updated from `Researching` to verified/compliant states.	**[Pre-Listing]**	Moves local rule research into a compliant status.
F. Policies and Contracts (05_Policies_Contracts)		

Task Item	Timing	Description
☐ House Rules policy is finalized and published.	**[Pre-Listing]**	Creates an enforceable legal agreement for every guest.
☐ Cancellation/refund policy is aligned and synchronized across platforms.	**[Pre-Listing]**	Standardizes the financial terms for guest changes.
☐ Cleaner service agreement is drafted/executed with SLA terms.	**[Pre-Listing]**	Sets clear performance and legal terms for turnovers.
☐ Handyman service terms is drafted/executed with emergency expectations.	**[Pre-Listing]**	Establishes the rules for emergency property repairs.
☐ Guest damage claim procedure is finalized and operational.	**[Pre-Listing]**	Prepares the legal process for recovering costs after damage.
☐ Storage locations for all required policy docs are set (not TBD).	**[Pre-Listing]**	Organizes all legal documents in a central, accessible place.
G. Legal Research Readiness Checklist Closure		
☐ Austin STR license requirements checklist is complete.	**[Pre-Listing]**	Completes the specific checklist for the local permit.
☐ Certificate of Occupancy checklist item is complete.	**[Pre-Listing]**	Verifies the house's foundational legal status.
☐ License display prep is complete (acrylic frame at entry).	**[Pre-Listing]**	Meets the legal requirement to show the permit to guests.
☐ Austin/Texas lodging tax checklist items are complete.	**[Pre-Listing]**	Confirms the property is ready to pay all required taxes.
☐ STR commercial policy + fire/egress checklist items are complete.	**[Pre-Listing]**	Validates that the insurance and fire safety meet legal rules.
☐ HOA/CC&R restrictions are verified from authoritative documents.	**[Pre-Listing]**	ensure the property is not in violation of private neighborhood rules.
Final review items are complete:	**[Pre-Listing]**	Confirms official verification, listing updates, and platform tax status.
☐ High-risk items verified via official sources.	**[Pre-Listing]**	Conducts a final check of the most dangerous legal gaps.
☐ License number added to listings.	**[Pre-Listing]**	Formally links the permit to the online booking platforms.
☐ Tax collection verified on Airbnb/VRBO.	**[Pre-Listing]**	Ensures the money flow includes the correct tax cuts.
H. House Rules Legal Integrity		

Task Item	Timing	Description
☐ Occupancy, noise, no-smoking, no-party, parking, and conduct rules are enforceable and consistent.	**[Pre-Listing]**	ensures the house rules are both fair and legally sound.
☐ Pet policy is fully defined (remove all `UNKNOWN` entries).	**[Pre-Listing]**	Eliminates confusion by setting clear rules for animals.
☐ Rule language is synchronized across house manual, listing, and platform rule fields.	**[Pre-Listing]**	Ensures the guest sees the same rules everywhere.
☐ Platform rule toggles are confirmed for occupancy, parties, smoking, and quiet hours.	**[Pre-Listing]**	Uses the platform's own enforcement tools for the house rules.
I. Liability Protection Verification		
☐ Fire/life safety control measures are physically implemented and tested.	**[Pre-Listing]**	Confirms that safety equipment is physically in the house.
☐ Noise/occupancy monitoring setup is active and verified.	**[Pre-Listing]**	Uses technology to prevent legal violations before they happen.
☐ Egress/mobility clearance verification is documented.	**[Pre-Listing]**	Documents that the property is safe for all guest types.
☐ Anti-tip and furniture safety controls are verified.	**[Pre-Listing]**	Protects guests and the owner from preventable accidents.
☐ Incident documentation and evidence collection workflow is active.	**[Ongoing]**	Builds a legal defense for future insurance or legal claims.
☐ Outstanding exposure areas are resolved before launch (insurance + permit status).	**[Pre-Listing]**	Fixes any remaining legal risks before the first guest.
J. Final Section Readiness		
☐ No `Researching`, `TBD`, or `UNKNOWN` items remain in critical launch requirements.	**[Pre-Listing]**	Guarantees that all legal work is finished before launch.
☐ All required trackers are current and auditable.	**[Ongoing]**	ensures the property's compliance is fully auditable.
☐ Legal controls are reflected in guest-facing content and platform settings.	**[Pre-Listing]**	Matches the property's legal rules with its marketing.
☐ Monthly/quarterly/annual compliance review cadences are scheduled.	**[Ongoing]**	plans for ongoing legal maintenance and renewals.
☐ `09_Legal_Compliance` is formally marked complete.	**[Pre-Listing]**	Formally marks the legal section as finished.
Completion Rule		

Task Item	Timing	Description
☐ Mark section complete only when all required items are checked or explicitly marked N/A with rationale.	**[Pre-Listing]**	Signals that all planning requirements have been met for the roadmap.

10 Maintenance Master Checklist

Task Item	Timing	Description
A. Foundation and Documentation		
☐ Confirm `INDEX.md` and `00_Section_Index.md` reflect the current folder structure and latest files.	**[Pre-Listing]**	Ensures all maintenance files are organized and up-to-date.
☐ Confirm `MAINTENANCE_STRATEGY.md` is aligned with current operating reality (occupancy, turnover cadence, vendor model).	**[Pre-Listing]**	Aligns property upkeep with actual usage and wear.
☐ Confirm all tracker files use the same status language (`Planned`, `Open`, `In Progress`, `Done`, etc.) and consistent owner fields.	**[Pre-Listing]**	Keeps the maintenance tracking clear and professional.
☐ Record review date and reviewer initials at the top of each tracker.	**[Ongoing]**	Provides accountability for recurring maintenance audits.
B. Preventive Maintenance Program (PM)		
☐ Move each PM line item (`PM-001` to `PM-007`) from planning to active scheduling with a due date.	**[Pre-Listing]**	Turns maintenance planning into a live, scheduled calendar.
☐ Assign an owner for each PM item (host vs vendor).	**[Pre-Listing]**	Clarifies who is responsible for each upkeep task.
☐ Verify the following PM items are calendared and documented:	**[Ongoing]**	Monitors HVAC, safety alarms, and appliance cleaning cycles.

Task Item	Timing	Description
☐ HVAC service and filter cadence.	**[Ongoing]**	Protects the most expensive house system through regular care.
☐ Smoke/CO alarm testing and battery policy.	**[Ongoing]**	ensures guest safety by verifying alarm functionality.
☐ Extinguisher checks.	**[Ongoing]**	Confirms that fire response tools are ready for use.
☐ Smart lock battery checks and spare battery stock.	**[Ongoing]**	Prevents guest lockouts by maintaining lock power.
☐ Drain flow checks and clogs prevention.	**[Ongoing]**	avoids plumbing emergencies through proactive cleaning.
☐ Dishwasher cleaning/descale cycle.	**[Ongoing]**	maintains appliance hygiene and performance.
☐ Water heater moisture/temperature safety checks.	**[Ongoing]**	monitors for leaks and temperature safety.
☐ Complete and sign off the Monthly Quick Pass checklist each month.	**[Ongoing]**	Conducts a rapid regular check of the whole property.
☐ Confirm quarterly and annual tasks from the preventative schedule are in calendar reminders.	**[Ongoing]**	plans long-term property care for larger systems.
☐ Confirm seasonal reset tasks are scheduled before peak and shoulder seasons.	**[Ongoing]**	prepares the home for extreme weather and high guest usage.
C. Repair Ticket Workflow (02_Repair_Tickets)		

Task Item	Timing	Description
☐ Review all open and in-progress tickets weekly.	**[Ongoing]**	ensures property fixes are moving toward completion.
☐ Close resolved tickets with final resolution notes, cost, and completion date.	**[Ongoing]**	Records the history and cost of all property repairs.
☐ For `RPR-002` (in progress), set a target completion date and escalation trigger.	**[Ongoing]**	sets a deadline for active, unfinished repairs.
☐ For `RPR-003` (open), assign owner and first action date.	**[Ongoing]**	initiates action on newly identified property issues.
☐ Add photo evidence links for every ticket where applicable.	**[Ongoing]**	provides visual proof of the issue and the final fix.
☐ Track root cause category for each repair (wear/guest misuse/vendor defect/system aging).	**[Ongoing]**	analyzes why things break to prevent future failures.
☐ Add a prevention step to PM schedule for repeat issues.	**[Ongoing]**	uses repair history to improve the preventive schedule.
D. Inspections Program (03_Inspections)		
☐ Confirm every scheduled inspection (`INSP-001` to `INSP-004`) has a firm date and owner.	**[Ongoing]**	ensures professional eyes are on the property regularly.
☐ Add pass/fail criteria for each inspection type.	**[Ongoing]**	standardizes the quality expected during house checks.
☐ Add required photo checklist for each inspection.	**[Ongoing]**	provides an auditable record of the property's condition.

Task Item	Timing	Description
☐ Ensure failed findings create linked repair tickets within 24 hours.	**[Ongoing]**	triggers immediate repairs for any inspection failures.
☐ Archive completed inspection reports in a consistent location.	**[Ongoing]**	maintains a legal and operational history of the home.
E. Asset Register and Lifecycle Management (04_Asset_Register)		
☐ Verify all critical assets are listed with install date, expected life, and replacement cost.	**[Pre-Listing]**	tracks the value and age of all property components.
☐ Confirm lifecycle entries for HVAC, dishwasher, faucet, smart lock, water heater, alarms, extinguisher, fire pit, mattress, and sleeper sofa.	**[Pre-Listing]**	plans for the eventual replacement of expensive systems.
☐ Add warranty details and expiration dates for each eligible asset.	**[Pre-Listing]**	uses manufacturer protection to save on repair costs.
☐ Add model/serial numbers for each maintainable asset.	**[Pre-Listing]**	speeds up repairs by having technical data ready.
☐ Create replacement forecast dates for high-risk assets (next 12-24 months).	**[Ongoing]**	avoids financial surprises by predicting future costs.
☐ Flag assets with repeated repairs for proactive replacement.	**[Ongoing]**	identifies unreliable items that should be removed.
F. Utilities and Building Systems Monitoring (05_Utilities_Systems)		
☐ Populate baseline readings where current fields are `TBD` (`UTL-001` to `UTL-004`).	**[Pre-Listing]**	Establishes the "normal" energy and water usage for the home.

Task Item	Timing	Description
☐ Set monthly utility reading capture date.	**[Ongoing]**	tracks utility costs to identify hidden leaks or waste.
☐ Define alert thresholds for unusual spikes (water, electric, gas, internet outages).	**[Ongoing]**	triggers investigation if utilities spike unexpectedly.
☐ Assign owner for anomaly investigation within 24 hours.	**[Ongoing]**	Finds the cause of high usage within 24 hours.
☐ Document corrective actions and outcome for each anomaly.	**[Ongoing]**	records how utility issues were resolved.
G. Property Systems Operating Manual Completion (05_Utilities_Systems)		
☐ Replace placeholders with actual field values (example: HVAC filter size).	**[Pre-Listing]**	finalizes the technical guide with actual house specs.
☐ Validate shut-off map details for water, electrical panel, gas, and internet equipment.	**[Pre-Listing]**	ensures emergency shutdowns can be found immediately.
☐ Confirm startup/shutdown procedures are complete and testable.	**[Pre-Listing]**	provides clear instructions for house system resets.
☐ Confirm troubleshooting steps are ordered by severity and urgency.	**[Pre-Listing]**	helps solve common house issues quickly and safely.
☐ Confirm backup supplies and replacement parts list is current.	**[Pre-Listing]**	keeps repair parts on hand for faster resolution.
H. Emergency Response Readiness (05_Utilities_Systems)		
☐ Validate emergency contacts list (vendors, utility providers, insurance, owner, backup host).	**[Pre-Listing]**	ensures help is one call away for any system.

Task Item	Timing	Description
☐ Verify response steps for leaks, outages, HVAC failure, and lockouts are actionable.	**[Pre-Listing]**	provides actionable plans for catastrophic house failures.
☐ Define escalation timeline (immediate, 30 min, 2 hr, same day) per incident type.	**[Pre-Listing]**	sets expectations for how fast help must arrive.
☐ Confirm guest communication templates exist for each emergency scenario.	**[Pre-Listing]**	prepares professional messages for house emergencies.
☐ Run a quarterly tabletop drill and record lessons learned.	**[Ongoing]**	tests the team's readiness for property crises.
I. Vendor and Service Management		
☐ Ensure every vendor has scope, SLA, contact method, backup contact, and service window.	**[Pre-Listing]**	ensures vendors know exactly what is expected of them.
☐ Confirm preferred vendors are mapped to each maintenance category.	**[Pre-Listing]**	connects the best contractors to each house system.
☐ Define after-hours and weekend coverage for critical systems.	**[Pre-Listing]**	secures help for guest emergencies in the middle of the night.
☐ Track vendor performance (response time, fix quality, repeat-call rate).	**[Ongoing]**	measures the quality and speed of property partners.
☐ Maintain at least one backup vendor for each critical category.	**[Pre-Listing]**	ensures the house is never without a service option.
J. Governance, QA, and Audit Cadence		

Task Item	Timing	Description
☐ Weekly: Review open repairs, urgent risks, and due PM items.	**[Ongoing]**	keeps maintenance tasks from falling behind.
☐ Monthly: Complete quick pass, update all trackers, and reconcile completed work.	**[Ongoing]**	conducts a comprehensive property health check.
☐ Quarterly: Audit inspections, vendor scorecards, and asset risk forecast.	**[Ongoing]**	evaluates the long-term effectiveness of the upkeep plan.
☐ Annually: Refresh full maintenance strategy and operating manual.	**[Ongoing]**	adjusts maintenance rules for the property's aging.
☐ Maintain a single “Maintenance Complete” gate: all critical PM current, no high-severity open repairs, emergency playbook validated, and systems manual complete.	**[Ongoing]**	prevents listing if the property is not physically sound.
K. Ready-to-List Maintenance Exit Criteria		
Check all before marking this category complete:	**[Pre-Listing]**	conducts a final audit of the entire maintenance section.
☐ No unresolved high-priority repair tickets.	**[Pre-Listing]**	ensures the house is in top shape for the first guest.
☐ Monthly quick pass completed and logged.	**[Pre-Listing]**	confirms the property has been recently verified.
☐ PM schedule fully active with future dates assigned.	**[Pre-Listing]**	proves the property has a long-term care plan.
☐ Inspections scheduled and tracked with owner accountability.	**[Pre-Listing]**	commits to future professional property checks.

Task Item	Timing	Description
☐ Utilities baselines populated and anomaly thresholds defined.	**[Pre-Listing]**	prepares the house for energy and water monitoring.
☐ Asset lifecycle and warranty fields complete.	**[Pre-Listing]**	validates the property's financial and physical health.
☐ Operating manual placeholders removed and verified.	**[Pre-Listing]**	ensures the house is understandable to guests and team.
☐ Emergency playbook contacts and workflows validated.	**[Pre-Listing]**	confirms the property is ready for the worst case.
☐ Vendor coverage includes primary + backup for critical systems.	**[Pre-Listing]**	ensures professional help is always available.
☐ Last maintenance review completed within the last 30 days.	**[Pre-Listing]**	guarantees that maintenance data is current.

11 Analytics Performance Master Checklist

Task Item	Timing	Description
A. Section Control and File Governance		
☐ Confirm `INDEX.md` and `00_Section_Index.md` reflect the current active file set.	**[Pre-Listing]**	maintains the organization of the property's data files.
☐ Confirm `ANALYTICS_STRATEGY.md`, `KPI_DASHBOARD.md`, and `PERFORMANCE_FEEDBACK_LOOP.md` are marked active and aligned.	**[Pre-Listing]**	aligns data tracking with the overall business goals.
☐ Confirm legacy maintenance artifacts in this folder are either intentionally retained or clearly marked as legacy references.	**[Pre-Listing]**	cleans up old data to prevent confusion in the trackers.
☐ Standardize statuses across all trackers (`Baseline`, `Planned`, `Active`, `Complete`, etc.).	**[Pre-Listing]**	ensures all performance tracking uses the same language.

Task Item	Timing	Description
☐ Add owner and last-reviewed date to each active tracker/document where missing.	**[Ongoing]**	provides accountability for data accuracy and reviews.
B. Analytics Strategy Activation (ANALYTICS_STRATEGY.md)		
☐ Validate the 3-pillars model is being used in weekly reviews:	**[Ongoing]**	monitors conversion, retention, and profitability weekly.
☐ Conversion (funnel quality).	**[Ongoing]**	monitors how effectively the listing turns views into stays.
☐ Retention (guest sentiment quality).	**[Ongoing]**	measures property quality through review and rating data.
☐ Profitability (RevPAR/RevPAN performance).	**[Ongoing]**	tracks the financial efficiency of the rental business.
☐ Confirm trigger thresholds are explicitly monitored:	**[Ongoing]**	sets alerts for when performance falls below acceptable levels.
☐ Conversion below 2%.	**[Ongoing]**	sets alerts for when performance falls below acceptable levels.
☐ Accuracy rating below 5 stars.	**[Ongoing]**	sets alerts for when performance falls below acceptable levels.
☐ RevPAR below floor-rate logic for two consecutive weeks.	**[Ongoing]**	sets alerts for when performance falls below acceptable levels.
☐ Confirm benchmark targets are adopted in operations:	**[Pre-Listing]**	adopts industry standards to measure the property's success.
☐ Occupancy target.	**[Pre-Listing]**	adopts industry standards to measure the property's success.
☐ ADR target.	**[Pre-Listing]**	adopts industry standards to measure the property's success.

Task Item	Timing	Description
☐ Booking window target.	**[Pre-Listing]**	adopts industry standards to measure the property's success.
C. KPI Dashboard Readiness (KPI_DASHBOARD.md)		
☐ Track weekly KPIs: Occupancy, ADR, RevPAN, Review Score Average, Unresolved Issues, Turnover Pass Rate.	**[Ongoing]**	provides a high-frequency view of property performance.
☐ Track monthly KPIs: Monthly Revenue, Booking Lead Time, In-Stay Issue Rate, PM Completion Rate, Physical Layout Accuracy.	**[Ongoing]**	summarizes long-term trends in revenue and operations.
☐ Validate KPI targets are documented and realistic for current launch phase.	**[Ongoing]**	ensures the property's goals are ambitious but reachable.
☐ Verify data source mapping for every KPI points to an actual maintained file.	**[Pre-Listing]**	confirms that dashboard numbers come from real logs.
☐ Define one owner responsible for weekly KPI updates.	**[Ongoing]**	assigns a single person to be the property's data lead.
D. Core Tracker Operations (Tracker__v1.csv, 01_Occupancy, 02_ADR_RevPAR, 03_Channel_Performance)		
☐ Populate weekly occupancy rows (`01_Occupancy`) with real nights booked and variance analysis.	**[Ongoing]**	tracks actual rental nights against property goals.
☐ Populate weekly finance rows (`02_ADR_RevPAR`) with real ADR and RevPAR outcomes.	**[Ongoing]**	monitors real revenue performance against the budget.
☐ Populate channel rows (`03_Channel_Performance`) with views, inquiries, bookings, and conversion rates for Airbnb and VRBO.	**[Ongoing]**	compares Airbnb and VRBO performance for optimization.
☐ Update `2026-04-01__PERFORMANCE_TRACKER__v1.csv` at least weekly (not just baseline).	**[Ongoing]**	keeps the master data log current and actionable.
☐ Add notes for every variance outside target bands.	**[Ongoing]**	explains why performance might be missing its targets.
☐ Ensure each row has status and owner updated as work progresses.	**[Ongoing]**	monitors the progress of data entry and analysis.

Task Item	Timing	Description
E. Guest Sentiment and Review Intelligence (Tracker__v1.csv, REVIEW_ANALYSIS_LOG__v1.csv)		
☐ Log every guest review with category-level ratings and summary.	**[Post-Listing]**	builds a database of guest feedback for analysis.
☐ Flag `action_required = Yes` items with owner and due date.	**[Post-Listing]**	ensures guest complaints lead to property improvements.
☐ Confirm sentiment issues are linked to a corrective action (and ticket when needed).	**[Post-Listing]**	connects guest words to physical property fixes.
☐ Investigate and close the current baseline gap on Accuracy/Value before listing scale-up.	**[Pre-Listing]**	fixes any low scores before the property scales up.
☐ Perform weekly root-cause review for any score below 5.0.	**[Post-Listing]**	analyzes every sub-5.0 score to prevent repeats.
F. Pricing Performance Analysis Cycle (ANALYSIS__v1.md)		
☐ Run monthly discount-sensitivity analysis (5%, 10%, 15% adjustments).	**[Ongoing]**	tests if price cuts are actually driving more income.
☐ Run premium-resistance analysis for rates above market baseline.	**[Ongoing]**	finds the upper limit of what guests will pay.
☐ Analyze last-minute pricing effects (3-5 day window) on net RevPAR.	**[Ongoing]**	measures the impact of "gap-fill" price drops.
☐ Track booking lead time and length-of-stay trends monthly.	**[Ongoing]**	understands guest behavior to optimize future pricing.
☐ Capture weekday vs weekend demand behavior and document response strategy.	**[Ongoing]**	adjusts rates based on the unique demand of each day.
☐ Push validated findings into `08_Pricing_Revenue` pricing model/rules.	**[Ongoing]**	uses data to automate future revenue gains.
G. Weekly KPI Command Center Execution (Command_Center__v1.md)		
☐ Execute the Weekly KPI Command Center every week (15-minute cadence).	**[Ongoing]**	conducts a rapid, high-impact data review every week.
☐ Fill all KPI input fields with current-week data.	**[Ongoing]**	ensures the team is looking at the latest possible data.

Task Item	Timing	Description
☐ Complete high-rigor health checks:	**[Ongoing]**	validates funnel conversion, yield capture, and sentiment drift.
☐ Funnel conversion check.	**[Ongoing]**	identifies any drops in listing performance immediately.
☐ Weekend premium/yield capture check.	**[Ongoing]**	verifies if the property is maximizing weekend revenue.
☐ Sentiment and accuracy drift check.	**[Ongoing]**	catches declining guest satisfaction before it's too late.
☐ Record decisions for next 7 days across pricing, marketing, and operations.	**[Ongoing]**	turns data findings into actionable tasks for the next week.
☐ Log specific issue IDs tied to weekly action items.	**[Ongoing]**	tracks exactly which property problems are being solved.
H. Feedback Loop Enforcement (PERFORMANCE_FEEDBACK_LOOP.md)		
☐ For every trigger, document the full chain: Trigger -> Insight -> Action -> System Update.	**[Ongoing]**	ensures data leads to real property improvements.
☐ Require a permanent upstream document update to close each loop.	**[Ongoing]**	closes the loop by changing the property's rules.
☐ Ensure each change references the originating log entry (review or maintenance).	**[Ongoing]**	maintains an auditable chain from complaint to fix.
☐ Verify cross-section updates are applied where required:	**[Ongoing]**	ensures improvements are applied to all house systems.
☐ `05_Operations` checklists.	**[Ongoing]**	ensures improvements are applied to all house systems.
☐ `07_Marketing_Listing` copy/photos.	**[Ongoing]**	ensures improvements are applied to all house systems.

Task Item	Timing	Description
☐ `08_Pricing_Revenue` pricing rules.	**[Ongoing]**	ensures improvements are applied to all house systems.
☐ `10_Maintenance` and procurement/system documents.	**[Ongoing]**	ensures improvements are applied to all house systems.
I. Maintenance-Analytics Integration (LOG.csv, SCHEDULE.md)		
☐ Track in-stay maintenance issue rate monthly from `MAINTENANCE_LOG.csv`.	**[Post-Listing]**	measures how often guests deal with broken items.
☐ Ensure unresolved maintenance issues are counted weekly in KPI reviews.	**[Ongoing]**	monitors the impact of repairs on guest stays.
☐ Confirm PM completion data is available and reviewable monthly.	**[Ongoing]**	verifies if preventive work is actually getting done.
☐ Replace `UNKNOWN` placeholders in preventative schedule (owner/frequency/risks/tasks).	**[Pre-Listing]**	finalizes the maintenance data tracking system.
☐ Verify recurring maintenance issues generate preventive plan updates.	**[Ongoing]**	uses data to fix permanent house weaknesses.
J. Cadence and Audit Discipline		
☐ Weekly: update occupancy, ADR/RevPAR, channel, sentiment, and command-center log.	**[Ongoing]**	maintains a high-frequency pulse on property health.
☐ Monthly: run pricing performance analysis and KPI rollup into revenue reporting.	**[Ongoing]**	provides deeper insights for strategic pricing shifts.
☐ Quarterly: run strategic pace review against Austin seasonality assumptions.	**[Ongoing]**	adjusts the business plan for Austin's seasonality.
☐ Maintain a single audit note each cycle: what changed, why, and expected impact.	**[Ongoing]**	records the "why" behind property changes.
K. Ready-to-List Analytics Exit Criteria		
Check all before marking this category complete:	**[Pre-Listing]**	verifies that trackers, command center, and feedback loops are active.
☐ All four core trackers (Occupancy, ADR/RevPAR, Channel, Sentiment) are live and updated.	**[Pre-Listing]**	confirms the property's data system is operational.

Task Item	Timing	Description
☐ Weekly KPI Command Center has at least one full completed run with decisions logged.	**[Ongoing]**	proves the team can use data to make decisions.
☐ KPI targets and thresholds are explicitly monitored with owner accountability.	**[Ongoing]**	ensures the property's goals are being actively tracked.
☐ At least one Trigger -> Insight -> Action loop is fully closed.	**[Ongoing]**	demonstrates that the data system can improve the house.
☐ Pricing analysis has been executed and fed into pricing rules.	**[Ongoing]**	proves the property is ready for competitive rates.
☐ Open sentiment issues have assigned actions and due dates.	**[Post-Listing]**	confirms the property is listening to guest feedback.
☐ Open maintenance-linked guest impact issues are tracked and escalated.	**[Ongoing]**	tracks the guest cost of physical property issues.
☐ Baseline placeholders (`0`, `TBD`, `UNKNOWN`) are converted to real operating values where possible.	**[Pre-Listing]**	finalizes the data system with real house facts.
