05_OPERATIONS SECTION VALIDATION REPORT

Audit Date: 2026-04-05
Scope: Complete validation of 05_Operations folder against prompt pack requirements
Auditor: GitHub Copilot CLI

EXECUTIVE SUMMARY

Overall State

The 05_Operations section is **structurally complete with all required artifacts but operationally empty**. The section contains **53 total files** with all 9 subsection audit documents (05A-05I), all 4 completion/framework documents, all 8 operational task documents (OPS-001 to OPS-008), 1 incident control (INC-001), and 12 operational trackers/checklists correctly created. However, **ALL artifacts exist as DRAFT shells** with `[MISSING_DATA]` placeholders, awaiting real operational data population.

Statistics

- **Total Files:** 53
- **Active Markdown Files:** 35
- **Archive Files:** 18 (properly segregated)
- **Completion Rate (Document Structure):** 100% (All required documents exist)
- **Completion Rate (Subsection Docs):** 100% (9 of 9 subsection audits exist: 05A-05I)
- **Completion Rate (Framework Docs):** 100% (4 of 4 completion docs exist)
- **Completion Rate (Operational Docs):** 100% (8 OPS + 1 INC + 12 trackers exist)
- **Completion Rate (Data Population):** 0% (All documents are DRAFT shells)

KEY INSIGHT: This is a **"Perfect Shell, Empty Core"** situation - excellent structure, zero operational data.

SECTION 1: EXPECTED DOCUMENTS VS. ACTUAL STATE

Based on the prompt pack in `.PROMPTS\TASK_MAPPED_PROMPT_PACK\05_Operations\`, the following documents and structures were required:

☑ **CONFIRMED COMPLETE** (All Required Documents Exist)

Governance & Framework Documents

Document ID	Expected Filename	Actual Filename	Status	Notes
00-Standards	`00_05_Operations_Run_Order_and_Standards.md`	`00_05_Operations_Run_Order_and_Standards.md`	☑ CORRECT	Complete governance doc with YAML frontmatter
05-Artifact	`05_Operations_Artifact_Generation.md`	`05_Operations_Artifact_Generation.md`	☑ CORRECT	Artifact coverage table complete
05-Challenge	`05_Challenge_Response_SOP.md`	`05_Challenge_Response_SOP.md`	☑ CORRECT	Challenge response procedures
05-Completion	`05_Completion_Rule_Final_Audit.md`	`05_Completion_Rule_Final_Audit.md`	☑ CORRECT	Final audit document
05-Task	`05_Operations_Task_Completion.md`	`05_Operations_Task_Completion.md`	☑ CORRECT	Master task registry

Subsection Audit Documents (05A-05I)

Document ID	Expected Filename	Actual Filename	Status	Notes

Document ID	Expected Filename	Actual Filename	Status	Notes
05A	`05A_Operations_Strategy_SOP_Foundation.md`	`05A_Operations_Strategy_SOP_Foundation.md`	☑ CORRECT	Strategy/SOP audit
05B	`05B_Turnover_Protocol_Execution.md`	`05B_Turnover_Protocol_Execution.md`	☑ CORRECT	Turnover protocol audit
05C	`05C_Supply_Inventory_Control.md`	`05C_Supply_Inventory_Control.md`	☑ CORRECT	Supply control audit
05D	`05D_Task_Calendar_Compliance.md`	`05D_Task_Calendar_Compliance.md`	☑ CORRECT	Task calendar audit
05E	`05E_Vendor_Service_Operations.md`	`05E_Vendor_Service_Operations.md`	☑ CORRECT	Vendor operations audit
05F	`05F_Incident_Resolution_Control.md`	`05F_Incident_Resolution_Control.md`	☑ CORRECT	Incident control audit
05G	`05G_Operational_Checklists_Gate.md`	`05G_Operational_Checklists_Gate.md`	☑ CORRECT	Checklists gate audit
05H	`05H_Cross_System_Consistency.md`	`05H_Cross_System_Consistency.md`	☑ CORRECT	Cross-system consistency
05I	`05I_Final_Section_Readiness.md`	`05I_Final_Section_Readiness.md`	☑ CORRECT	Final readiness audit

Operational Task Documents (OPS-001 to OPS-008 + INC-001)

Document ID	Expected Filename	Actual Filename	Status	Notes
OPS-001	`OPS-001_Post_Checkout_Audit.md`	`OPS-001_Post_Checkout_Audit.md`	☑ CORRECT	Post-checkout audit
OPS-002	`OPS-002_Full_Reset_Cleaning.md`	`OPS-002_Full_Reset_Cleaning.md`	☑ CORRECT	Full reset cleaning
OPS-003	`OPS-003_Arrival_Quality_Walkthrough.md`	`OPS-003_Arrival_Quality_Walkthrough.md`	☑ CORRECT	Arrival quality check
OPS-004	`OPS-004_Consumables_PAR_Restock.md`	`OPS-004_Consumables_PAR_Restock.md`	☑ CORRECT	Consumables PAR restock
OPS-005	`OPS-005_Linen_Rotation_Damage_Audit.md`	`OPS-005_Linen_Rotation_Damage_Audit.md`	☑ CORRECT	Linen rotation audit
OPS-006	`OPS-006_Smart_Lock_Code_Refresh.md`	`OPS-006_Smart_Lock_Code_Refresh.md`	☑ CORRECT	Smart lock code refresh
OPS-007	`OPS-007_Vendor_Performance_Review.md`	`OPS-007_Vendor_Performance_Review.md`	☑ CORRECT	Vendor performance review
OPS-008	`OPS-008_Preventive_Safety_Check.md`	`OPS-008_Preventive_Safety_Check.md`	☑ CORRECT	Preventive safety check
INC-001	`INC-001_Incident_Resolution_Control.md`	`INC-001_Incident_Resolution_Control.md`	☑ CORRECT	Incident resolution control

Core Operational Trackers & SOPs

Document	Expected Filename	Actual Filename	Status	Notes
Strategy	`Operations_Strategy.md`	`Operations_Strategy.md`	☑ EXISTS	DRAFT shell
SOP Master	`SOP_Master.md`	`SOP_Master.md`	☑ EXISTS	DRAFT shell

Document	Expected Filename	Actual Filename	Status	Notes
Turnover Standard	`Turnover_Standard.md`	`Turnover_Standard.md`	☑ EXISTS	DRAFT shell
Turnover Checklist	`Turnover_Checklist.md`	`Turnover_Checklist.md`	☑ EXISTS	DRAFT shell
PAR Level Register	`PAR_Level_Register.md`	`PAR_Level_Register.md`	☑ EXISTS	DRAFT shell
Supply Action List	`Supply_Action_List.md`	`Supply_Action_List.md`	☑ EXISTS	DRAFT shell
Task Calendar Tracker	`Task_Calendar_Tracker.md`	`Task_Calendar_Tracker.md`	☑ EXISTS	DRAFT shell
Vendor Management Tracker	`Vendor_Management_Tracker.md`	`Vendor_Management_Tracker.md`	☑ EXISTS	DRAFT shell
Vendor Access SOP	`Vendor_Access_SOP.md`	`Vendor_Access_SOP.md`	☑ EXISTS	DRAFT shell
Incident Resolution Log	`Incident_Resolution_Log.md`	`Incident_Resolution_Log.md`	☑ EXISTS	DRAFT shell
Arrival Quality Checklist	`Arrival_Quality_Checklist.md`	`Arrival_Quality_Checklist.md`	☑ EXISTS	DRAFT shell
Turnover Day Quick Checklist	`Turnover_Day_Quick_Checklist.md`	`Turnover_Day_Quick_Checklist.md`	☑ EXISTS	DRAFT shell

SECTION 2: MISSING DOCUMENTS

☑ NO MISSING DOCUMENTS

Observation: The 05_Operations section is **100% complete** in terms of document structure. All required documents from the prompt pack exist in the active folder.

Document Count Verification:

- Expected from prompts: ~35 documents
- Actual in active folder: 35 documents
- Missing: **0 documents**

This is in stark contrast to:

- 01_Planning: Missing 10-12 critical documents
- 03_Furnishing_Procurement: Missing 4 documents

SECTION 3: NAMING & ORGANIZATIONAL ISSUES

☑ NAMING COMPLIANCE (Excellent Adherence)

Observation: The 05_Operations section demonstrates **perfect naming discipline**. All files follow structured conventions precisely.

Aspect	Status	Evidence
Subsection Naming (05A-05I)	☑ PERFECT	All 9 files use correct `05[LETTER]_[Title].md` format
OPS Task Naming	☑ PERFECT	All 8 files use correct `OPS-[NUM]_[Title].md` format
INC Naming	☑ PERFECT	INC-001 follows correct format
Tracker Naming	☑ PERFECT	All 12 trackers use clear descriptive names
YAML Frontmatter	☑ PERFECT	All documents have proper `id`, `title`, `date` frontmatter
No Unstable Versions	☑ PERFECT	No `v1`, `v2`, `final`, etc. suffixes found
No Duplicates	☑ PERFECT	No duplicate same-purpose files detected

⚠ STRUCTURAL OBSERVATIONS

Issue	Current State	Expected State	Impact
Desktop.ini Present	`desktop.ini` and `folderico-red.ico` exist	Not required by prompts	MINOR - Windows artifacts
Archive Structure	`.ARCHIVE` properly segregated with 18 files	Correctly implemented	CONFIRMED CORRECT ☑
All Docs Are DRAFT	Every operational doc shows `DRAFT` or `BLOCKED` status	Expected operational data	**CRITICAL** - No live operational data

SECTION 4: DATA POPULATION STATUS (CRITICAL FINDING)

⚠ THE "PERFECT SHELL, EMPTY CORE" PROBLEM

Critical Observation: While 100% of required documents exist with perfect naming and structure, **0% contain operational data**.

Document Category	Structure Status	Data Status	Evidence
Strategy & SOP Foundation	☑ COMPLETE	✕ EMPTY	`Operations_Strategy.md` shows `[MISSING_DATA]` for process maturity, staffing model, turnover pass rate
Turnover Protocols	☑ COMPLETE	✕ EMPTY	`Turnover_Standard.md` has no photo packages, manager walkthrough evidence
Supply Control	☑ COMPLETE	✕ EMPTY	`PAR_Level_Register.md` has no PAR targets, on-hand counts, or evidence paths
Task Calendar	☑ COMPLETE	✕ EMPTY	`Task_Calendar_Tracker.md` has no owners, last-done dates, next due dates
Vendor Management	☑ COMPLETE	✕ EMPTY	`Vendor_Management_Tracker.md` has no vendor identities, contacts, insurance verification
Incident Logs	☑ COMPLETE	✕ EMPTY	`Incident_Resolution_Log.md` has no live incident entries
Quality Checklists	☑ COMPLETE	✕ EMPTY	`Arrival_Quality_Checklist.md` has no pre-arrival checkpoint statuses

Specific `[MISSING_DATA]` Placeholders Found:

From `05_Operations_Artifact_Generation.md`, the following data is missing from ALL 12 core artifacts:

1. **Operations Strategy (OPS-001):** Process maturity, staffing model, turnover pass rate
2. **SOP Master (OPS-002):** Approved SOP owners, revision cadence
3. **Turnover Standard (OPS-003):** Photo package path, manager walkthrough evidence
4. **Turnover Checklist (OPS-004):** Zone-by-zone completion statuses and evidence paths
5. **PAR-Level Register (OPS-005):** PAR targets, on-hand counts, evidence paths for all consumables
6. **Supply Action List (OPS-006):** Owners, due dates, execution evidence for audits/reorders
7. **Task Calendar Tracker (OPS-007):** Owners, last-done dates, next due dates, evidence paths for OPS-001..008
8. **Vendor Management Tracker (OPS-008):** Vendor identities, contacts, insurance verification, SLA targets
9. **Vendor Access SOP (OPS-009):** Lock platform details, approvers, escalation contacts
10. **Incident & Resolution Log (OPS-010):** Live incident entries, severity, owner, timestamps, closure evidence
11. **Arrival Quality Checklist (OPS-011):** Pre-arrival checkpoint statuses and evidence links
12. **Turnover Day Quick Checklist (OPS-012):** Mobile pass/fail entries, timing gates, manager signoff evidence

---

SECTION 5: TASK COMPLETION STATUS ANALYSIS

From `05_Operations_Task_Completion.md`, here is the comprehensive task status:

Section A: Operations Strategy & SOP Foundation

Task	Status	Evidence Path	Blocker
Strategy aligned to Operational Excellence	IN_PROGRESS	Operations_Strategy.md	Intent documented, no workflow evidence
3 Pillars active (Sanitation, Staging, Incident)	BLOCKED	[MISSING_EVIDENCE]	No daily workflow execution records
Golden Window enforced (11am-4pm)	BLOCKED	[MISSING_EVIDENCE]	No turnover logs proving timing
Cleaning complete by 2:30 PM	BLOCKED	[MISSING_EVIDENCE]	No timestamped completion proof
Green status by 3:30 PM	BLOCKED	[MISSING_EVIDENCE]	No gate proof logs/photos
SOP dependencies current	IN_PROGRESS	SOP_Master.md	Map exists, execution evidence absent

Section A Status: 2 IN_PROGRESS, 4 BLOCKED (0% complete)

Section B: Turnover Protocol Execution

- All 8 turnover tasks (Great Room, Kitchen, Coffee Bar, Primary Suite, Hallway, Patio, Tech, Walkthrough): **BLOCKED**
- Reason: No stay-level completion evidence or photo paths

Section B Status: 0 of 8 tasks complete (0% complete)

Section C: Supply & Inventory Control

- All 8 supply tasks (PAR register, current counts, 3x linen, bulk dispensers, automation, weekly audits, reorder triggers, reconciliation): **BLOCKED**
- Reason: No operational data in PAR register or evidence of execution

Section C Status: 0 of 8 tasks complete (0% complete)

Section D: Task Calendar Compliance

- All 9 calendar tasks (OPS-001 through OPS-008 execution, task status tracking): **BLOCKED**
- Reason: All OPS audit reports state "blocked due to missing input evidence"

Section D Status: 0 of 9 tasks complete (0% complete)

Section E-I: Remaining Sections

Similar BLOCKED status across vendor management, incident resolution, checklists, consistency, and final readiness.

Overall Task Completion: ~0% (0 of ~60 tasks complete)

SECTION 6: CONFIRMED CORRECT IMPLEMENTATIONS

☑ THINGS DONE EXCEPTIONALLY WELL

1. **100% Document Coverage:** All required documents exist - no gaps ☑
2. **Perfect Naming Discipline:** All files follow structured conventions precisely ☑
3. **Complete Subsection Framework (05A-05I):** All 9 audit documents exist ☑
4. **Complete Framework Layer (4 docs):** Artifact generation, challenge SOP, completion audit, task completion ☑
5. **Complete Operational Layer (20 docs):** All OPS tasks, trackers, checklists, and SOPs exist ☑
6. **YAML Frontmatter Consistent:** All documents have proper structured metadata ☑
7. **Archive Segregation:** `.ARCHIVE` properly used for historical reference only ☑
8. **Property Anchors Present:** 142" island, 158" hallway, 300" great room, 468" patio consistently referenced ☑
9. **Golden Window Defined:** 11am-4pm turnover window explicitly documented ☑
10. **Timing Gates Specified:** 2:30 PM clean complete, 3:30 PM QC Green documented ☑
11. **No Version Proliferation:** No unstable version suffixes anywhere ☑
12. **Anti-Hallucination Standards:** `[MISSING_DATA]` used appropriately instead of fake data ☑

Overall Assessment: This section demonstrates **world-class structural discipline** and **rigorous documentation standards**.

SECTION 7: CATEGORIZED FINDINGS SUMMARY

CRITICAL ISSUES (Block Operational Readiness)

1. ⚠ **Zero Operational Data Population:** All 35 documents exist as DRAFT shells with `[MISSING_DATA]` placeholders
2. ⚠ **No Execution Evidence:** No turnover logs, completion photos, timestamps, or proof of workflow enforcement
3. ⚠ **No Vendor Data:** Vendor Management Tracker has no actual vendor contacts or SLA data
4. ⚠ **No Supply Data:** PAR Level Register has no PAR targets or on-hand counts
5. ⚠ **No Task Tracking Data:** Task Calendar Tracker has no owners, dates, or status entries
6. ⚠ **No Incident History:** Incident Resolution Log has no actual incident entries

MAJOR ISSUES (None - Structure is Perfect)

- No major structural, naming, or organizational issues found

MINOR ISSUES (Low Impact)

7. 📋 Desktop.ini and icon files present (Windows artifacts, not required)

STRENGTHS (Exceptional Implementation)

8. ☑ 100% document coverage (all required docs exist)
9. ☑ Perfect naming conventions (zero violations)
10. ☑ Proper use of `[MISSING_DATA]` (anti-hallucination discipline)
11. ☑ Complete framework layer (4/4 completion docs exist)
12. ☑ Complete operational layer (20/20 operational docs exist)

SECTION 8: RECOMMENDED ACTION PLAN

Phase 1: Understand the Context (Priority 1)

Critical Question: Is this section intended to be **pre-operational** (templates for future use) or **operational** (live tracking system)?

Investigation Required:

1. Review project timeline - has the property launched yet?
2. Check if 05_Operations is meant to be populated post-launch
3. Determine if there's a separate live operational system

If Pre-Operational (Property Not Yet Launched):

- **Action:** Mark section as "TEMPLATE COMPLETE - AWAITING LAUNCH DATA"
- **Next Steps:** No immediate action; populate trackers as operations begin
- **Status:** ACCEPTABLE current state

If Operational (Property Is Live):

- **Action:** URGENT data population required across all trackers
- **Next Steps:** Immediate operational data ingestion campaign
- **Status:** CRITICAL gap requiring remediation

Phase 2: Data Population Campaign (If Operational)

If the property is already operational, execute this data population plan:

Week 1: Core Strategy & Vendor Data

1. Populate `Operations_Strategy.md`: Add staffing model, process maturity assessment, turnover pass rate baseline
2. Populate `Vendor_Management_Tracker.md`: Add all active vendor contacts, insurance verification, SLA targets
3. Populate `Vendor_Access_SOP.md`: Add smart lock platform details, approvers, escalation contacts

Week 2: Supply & Inventory Data

4. Populate `PAR_Level_Register.md`: Set PAR targets for all consumables (coffee, TP, paper towels, dish pods, laundry pods, toiletries, trash bags)
5. Conduct initial stock count and update on-hand quantities
6. Populate `Supply_Action_List.md`: Add owners, due dates for audits and reorders

Week 3: Task Calendar & Scheduling Data

7. Populate `Task_Calendar_Tracker.md`: Assign owners for all OPS-001 through OPS-008 tasks
8. Set "last done" dates based on recent activity or set to launch date
9. Calculate "next due" dates based on task frequency (daily, weekly, monthly)

Week 4: Turnover & Quality Evidence

10. Execute next turnover with photo documentation at each stage
11. Populate `Turnover_Checklist.md` with zone-by-zone completion evidence
12. Document `2:30 PM` clean complete and `3:30 PM` QC Green gate with timestamps and photos
13. Populate `Arrival_Quality_Checklist.md` with pre-arrival checkpoint results

Ongoing: Operational Logging

14. Begin logging incidents in `Incident_Resolution_Log.md` as they occur
15. Update trackers after each turnover
16. Conduct weekly stock audits and update PAR register
17. Execute monthly vendor performance reviews and safety checks

Phase 3: Minor Cleanup (Priority 3)

18. **Remove Windows Artifacts** (Optional)

- Delete `desktop.ini` and `folderico-red.ico`

SECTION 9: PROPOSED EXACT CHANGES

IF PRE-OPERATIONAL (No Changes Required):

```
No file changes needed. Section is complete as template framework.
Update section status to: "TEMPLATE COMPLETE - AWAITING LAUNCH DATA"
```

IF OPERATIONAL (Urgent Data Population Required):

NO FILE STRUCTURE CHANGES NEEDED - All documents exist and are correctly structured.

DATA POPULATION REQUIRED (Update existing files with operational data):

```
UPDATE (with operational data):
- Operations_Strategy.md (add staffing, process maturity, pass rate)
- Vendor_Management_Tracker.md (add vendor contacts, SLAs)
- PAR_Level_Register.md (add PAR targets, on-hand counts)
- Task_Calendar_Tracker.md (add owners, dates, status)
- Turnover_Checklist.md (add evidence paths after each turnover)
- Incident_Resolution_Log.md (add incident entries as they occur)
- Supply_Action_List.md (add audit schedules, reorder events)
- Vendor_Access_SOP.md (add smart lock details)
- Arrival_Quality_Checklist.md (add pre-arrival statuses)
- Turnover_Day_Quick_Checklist.md (add mobile entries)
- (All other trackers similarly need data population)
```

OPTIONAL DELETES:

```
DELETE: 05_Operations/desktop.ini
DELETE: 05_Operations/folderico-red.ico
```

NO RENAMES REQUIRED: All files follow correct naming conventions.

NO ARCHIVE MOVES REQUIRED: Archive is properly segregated.

SECTION 10: COMPLETION VERDICT

Current Status: ☑ STRUCTURALLY PERFECT / ⚠ OPERATIONALLY EMPTY

Reasoning:

- ☑ 100% of required documents exist (35/35)
- ☑ Perfect naming discipline (0 violations)
- ☑ All subsection audits complete (9/9)
- ☑ All framework documents complete (4/4)
- ☑ All operational documents complete (20/20)
- ⚠ 0% operational data population (all docs are DRAFT shells)
- 🔍 Context unknown: pre-operational templates vs live operational tracking?

Required to Achieve "OPERATIONALLY COMPLETE" Status:

IF Property Is Live:

1. Populate all 12 core operational trackers with real data
2. Execute first documented turnover with photo evidence
3. Update task calendar with owners, dates, and status
4. Add vendor contacts and SLA targets
5. Set PAR levels and conduct initial stock count
6. Begin logging incidents as they occur

IF Property Is Pre-Launch:

- No action required; section is complete as template framework
- Mark status as "TEMPLATE COMPLETE - AWAITING LAUNCH"

Estimated Effort to Populate (If Operational):

- **Week 1:** ~8-10 hours (strategy, vendor data)
- **Week 2:** ~6-8 hours (supply/inventory data)

- **Week 3:** ~4-6 hours (task calendar setup)
- **Week 4:** ~4-6 hours (turnover evidence capture)
- **Total:** ~22-30 hours for initial population
- **Ongoing:** ~2-4 hours per week for maintenance

SECTION 11: COMPARISON TO OTHER SECTIONS

Completion Status Comparison:

Section	Document Structure	Data Population	Overall Status
01_Planning	33% (missing 10 docs)	95% (BUD/TIM/RSK/MKT populated)	INCOMPLETE - Framework gaps
03_Furnishing_Procurement	80% (missing 4 docs)	60% (some CSV data exists)	SUBSTANTIAL - Certification gaps
05_Operations	100% (all docs exist)	0% (all DRAFT shells)	PERFECT STRUCTURE - Empty core

Key Observations:

- **05_Operations** has the **best document structure** of all three sections reviewed
- **05_Operations** has the **worst data population** of all three sections reviewed
- **01_Planning** is the opposite: good data, missing framework
- **05_Operations** + **01_Planning** = Perfect system (if combined)

Unique Position: Section 05 is **"Implementation Ready"** - all templates exist, just needs operational data ingestion.

VALIDATION CERTIFICATION

This validation report confirms:

1. ☑ All 35 required documents exist in active folder (100% coverage)
2. ☑ All naming conventions followed perfectly (0 violations)
3. ☑ Archive segregation correctly implemented
4. ☑ YAML frontmatter present and consistent across all documents
5. ☑ Property anchors (142", 158", 300", 468") consistently referenced
6. ☑ Golden Window and timing gates properly documented
7. ⚠ All documents exist as DRAFT shells with `[MISSING_DATA]` placeholders
8. 🔍 Operational status unclear: template framework vs live tracking system
9. ☑ No files have been modified during this review (validation-only pass)

Critical Determination Needed: Is this property currently operational or pre-launch?

Next Step: Await user clarification on operational status before determining if data population is required.

Report Generated: 2026-04-05
Validation Method: Manual review against prompt pack requirements
Files Reviewed: 53 total (35 active + 18 archive)
Key Finding: Perfect documentation framework awaiting operational data population.
Assessment: "Template Excellence, Execution Pending"
